## DEAR FRIENDS OF BLACKYAK

Many things have changed since our beginnings in 1973: today, we are a market leader in South Korea, and our collections are available all over the world – thanks to the dedicated work of all BLACKYAK employees.

In order to be as innovative as possible, BLACKYAK invests a great deal of time and money. This is only feasible because BLACKYAK is not listed on the stock market and is still a family-run business. Therefore, we have more time for long-term visions and innovations than other companies. The large number of awards we have won in recent years shows that this is the way forward. And we will not stop. After a successful year, we want to strengthen our position in the global market with the new BLACKYAK GLOBAL collection for Fall/Winter 2020/2021. BLACKYAK is once again offering an incredibly innovative and technical collection for the exciting winter months. Taking cues from our previous winter and summer collections, we are offering bold styles lines, innovative materials and industry-leading construction techniques.

At BLACKYAK, however, it is not only about garments. We are also very aware of our social responsibility. We build schools, clean up the mountains and do a lot of social activities. Ambitious goals and social compatibility do not have to be in conflict. With this approach, we also want to remain successful over the next years.

I am with you!

Tae Sun Kang

73  
80

1973 Establishment of the Himalayan original BLACKYAK by Tae Sun Kang who opened his first shop in the 'Garment District' of the South Korean capital Seoul.

1980 Sponsorship of a Korean expedition team which climbed the Nanga Parbat, also called the 'King of the Mountains'.

90  
00

1994 Acquisition of GORE-TEX trade mark licence for production and sales.

1998 BLACKYAK launches in China. Stores opened in 18 major department stores in Beijing, including Tianjin and Yansha.

20  
10

2004 BLACKYAK debuts at the ISPO in Beijing, China.

2010 Establishment of 'BLACKYAK CO., LTD.' Success of Eun-sun Oh in reaching all 14 summits of 8,000m.

11  
15

2011 Establishment of a 15,000 m<sup>2</sup> automatic distribution centre in Yangji. It is one of the largest logistics centres in the outdoor industry.

2010 BLACKYAK debuts at the ISPO Munich, Germany. ISPO Award 'Asian product of the year' for the mountaineering jacket 'B1XG1 Jacket'.

2014 European headquarters with showroom and office opens in Munich, Germany.

2015 ISPO Award 'Asian Products Hiking and Trekking Shoes' for the hiking shoe 'Driven GTX' BLACKYAK donates one million dollars for the victims of the earthquake in Tibet. Launch in Europe – sell-in starts.

16  
17

2016 The BLACKYAK Fall/Winter collection 16/17 is available in selected outdoor stores in Europe and North America. The jury at the ISPO Awards honours BLACKYAK with eleven awards for its products – eight of which are gold! A unique record in the history of the ISPO Awards.

2017 ISPO Award for the 'Signature Jacket', the 'Heavy-Duty Down Jacket' and the 'Vivid Jacket'. With 16 awards in total, BLACKYAK is the most successful company in the history of the ISPO Awards.

Polartec Apex Award for the 'Combat Shirt'.

18  
19

2018 Launch of the BLACKYAK MID-SHELL® category. ISPO Gold Award for the 'Modicana Jacket'. The 'Hariana Jacket' and the 'Brangus Jacket' are also awarded the title ISPO Winner.

2019 For the Fall/Winter season, BLACKYAK introduces its Into Air™ technology platform. BLACKYAK strengthens its position as ISPO's most successful brand by winning 24 awards in total. The 'Mountain Shemagh', the 'Kostroma Jacket' and the 'Sindhi Vest' are awarded at the ISPO 2019 with the ISPO Gold Award; the 'Watusi Down Suit' and the 'Calvana Hoody' are bestowed the title ISPO Winner.

# TECHNOLOGY

## BLACKYAK GARMENT DEVELOPMENT PROCESS

**Corporate strategy & philosophy**  
BLACKYAK uses a unique development process to deliver the highest quality products to our customers and users.

### Conceptual design

Every new development starts with an idea, a lack of something or an invention from another field. Then we start with a conceptual design.

### Material sourcing & development

For our unique products, we need unique materials. If we can't find one that fits our idea, we develop it ourselves.

### Concept development

The drawing takes shape; the idea becomes a concept. All materials are sourced or developed.

### Prototype development

Every prototype is tailored with great care. Finally, it must prove itself on expeditions.

### Commercial collection

We brief our producers very carefully so that the final product reaches the customer in the highest quality available.

### Sign-off

When we are 100% satisfied with our new product, the BLACKYAK garment development process ends.

### Revision

If there is a 'beyond the limits' challenge, the product will be revised and re-tested. We are only satisfied when everything is right.

### Testing

There are no harder judges than our athletes. They test our products to the limits and beyond.

### Fitting

As no two people are made the same, we have organised our products into specific fits: our fit categories are ATHLETIC FIT and PERFORMANCE FIT.

APPROVED

## PARTNERS WE WORK WITH

Warm, light and breathable – even in extremely wet and cold weather: the revolutionary G-LOFT® insulation meets the highest standards and combines the benefits of natural down with the ruggedness of a synthetic fibre.

Products engineered with GORE-TEX fabric are durably waterproof and windproof, combined with optimised breathability – enduring products that maximise protection and comfort for the wearer. All GORE-TEX products are covered by the GUARANTEED TO KEEP YOU DRY™ promise.

The GORE-TEX INFINIUM™ WINDSTOPPER® product technology collection offers totally windproof and breathable apparel. Designed for flexibility, functionality and style to support your active life – when comfort and performance are the priority, and waterproofness isn't.

CORDURA® is the brand name for a collection of fabrics used in a wide array of products including luggage, rucksacks, pants, military wear and performance apparel. CORDURA® fabrics are known for their durability and resistance to abrasions, tears and scuffs. CORDURA® fabrics are usually made of nylon but may be blended with cotton or other natural fibres.

## Kevlar®

Kevlar® fibre is used to make a variety of clothing, accessories and equipment safe and cut-resistant. It's lightweight, durable and extraordinarily strong. It's best known for its use in ballistic and stab-resistant body armour. But it's also used on the ski slopes, the switchback trails, in demanding desert terrain, even the outer limits of space.

With a wide variety of different materials and textiles, Polartec® offers the possibility to meet demanding outdoor challenges with fun and energy – even in bad weather.

PrimaLoft® is a synthetic microfibre thermal insulation. PrimaLoft® insulation is used inside insulated garments for its warmth, compressibility and soft comfort. While the human body uses energy to stay warm, PrimaLoft® insulation uses a proprietary microfibre structure to help the body retain warmth and conserve energy.

RECCO® technology is a tool for professional rescuers to help locate buried victims, enabling professional rescuers to find victims within minutes.

Re:Down® recycles down and feathers extracted from post-consumer goods so that they can be reused as filling material in apparel, sleeping bags or bedding products. Broken feathers and down fibres are upcycled into a very efficient organic fertiliser.

Durable warmth: Climashield® APEX's strong continuous filament is thermally efficient and durable. Even after many washes and intensive use, Climashield® APEX retains its shape and insulating properties.

## BLACKYAK PROPRIETARY TECHNOLOGY

Cuffs, hood and hemline are the weakest points on a garment when trying to keep you dry. The YAK SEAL™ Water Barrier Technology reduces the ingress of moisture significantly in these areas.

Absorption and friction from the garment create a peristaltic movement so that water moves up your jacket in a wet environment. Many brands use a DWR treatment to prevent this effect, but due to the hydrophilic properties of the GORE-TEX membrane, it's just a matter of time until water passes through. The YAK SEAL™ Water Barrier Technology consists of several techniques.

- The use of dissimilar materials slows down the wicking or capillary effect.
- A ripstop weave using CORDURA® fibres creates a durable surface that impedes the capillary effect associated with other wicking barrier types.
- The small cross-sectional area of the wicking barriers means there is very little space for moisture to accumulate.
- A hydrophobic adhesive layer is used to bond the wicking barrier to the main garment textile.
- Finally, a durable overlay film seals the edge of the structure.
- The net effect significantly increases the garment performance in three different axes.

BLACKYAK introduced the BLACKYAK MIDSHELL® product category to the outdoor apparel industry for the 2018–2019 winter season.

Outdoor enthusiasts now demand more utility of their clothing. In addition, environmental changes affecting weather mean that traditional buying periods have shifted. To address this new user need, BLACKYAK created BLACKYAK MIDSHELL®. BLACKYAK MIDSHELL® products combine the comfort and thermo-regulation of a mid-layer with the protective features from hard-shell products. By using special membranes and structures, we can maximise the moisture vapour permeability while simultaneously providing adequate weather protection.

This technology is a passive safety enhancement that BLACKYAK has integrated into several garments. It was designed to offer its wearer a 'second chance' when using it under low light or even in nighttime circumstances.

Using specialised equipment and techniques, BLACKYAK has taken established reflective technologies and integrated them into the manufacturing of its products. The result is a very low-profile tonal appearance under normal light conditions. However, using the properties of refraction and reflection, light is reflected back towards its source when the area is illuminated by light.

**YAK XD™**  
XTREME DURABILITY  
TECHNOLOGY

YAK XD™ Xtreme Durability Technology was developed to combine high levels of durability with high recovery elasticity to allow unrestricted range of movement. Using CORDURA® fibres in unique constructions that provide air permeability, stretch and durability, YAK XD™ Xtreme Durability Technology is the new gold standard in technical textiles and outerwear.

**YAK FLOW™**  
COMFORT  
TECHNOLOGY

Based on field and laboratory tests, fabrics with an air permeability of less than 6l/m²/s provide the same protection against heat loss as a fabric with 0l/m²/s.

**YAK HOOKS™**  
LOCK & HOLD  
PROTECTION

YAK HOOKS™ Lock & Hold Protection brings added durability, ease of use and visual appeal to the cuff area of our garments. The unique design of the hooks minimises abrasion and pilling while the pre-curved finish ensures the cuff tab always rests in the closed position.

**YAK BOX-WALL™**  
AIR FLOW  
CONSTRUCTION

YAK BOX-WALL™ Air Flow Construction is an innovative construction for down jackets which decouples the cold exterior of a textile from the insulation layer.

Using this technique, thermal efficiency of the product is significantly increased. The YAK BOX-WALL™ performance is further enhanced through the use of chamber-to-chamber transfer channels. This allows warm air inside the garment to move from chamber to chamber rather than venting to the atmosphere as is the case with traditionally insulated manufacturing methods.

Winter is upon us again and BLACKYAK is proud to offer to you our latest collection. This new and exciting winter palette offers up a selection of two individual color stories for both the men's and women's collections and a lot of exciting unisex colors for our winter products.

Starting with our men's collection, we're offering two color stories with three individual colors. To add high visibility, we are once again using different red colors from 'Fiery Red' over 'Fired Brick' to a 'Bitter Chocolate' brown color. With the colors 'Everglade', 'Reflecting Pond' and 'India Ink', we're showing a range of green and blue shades next winter.

Moving on to our women's palette: this well-balanced offering begins with a shade of pink in the tone of 'Beetroot Purple' and has been blended using the darker tone of 'Sangria' and 'Grape Wine'. For a green story, we decided on the light tone 'Hemlock', the darker version 'Mallard Green' and 'Sea Moss' as our three green colors for the Fall/Winter 2020/2021 season.

For our unisex colors, we're offering, as every year, our three different shades of black and grey – 'Black Beauty', 'Phantom' and 'Iron Gate'. The colors 'Snorkel Blue', 'Navy Peony' and 'Maritime Blue' present our different shades of blue. New for Fall/Winter 2020/2021 are our orange-brown tones. A warm orange is provided by the color 'Bright Marigold'. 'Honey Ginger' features a mix of orange and brown, whereas the color 'Emperador' offers a darker shade of brown.

This collection represents another developmental step in the BLACKYAK journey. We are very proud to offer you a new option in technical apparel. Stunning colors and intelligent combinations represent our dedication to bring you newness colored beautifully.

BLACKYAK wishes you a fantastic winter!

# BLACKYAK BARZONA BC

2010001 - MEN

Fully equipped, freeride-oriented three-layer GORE-TEX PRO jacket for serious backcountry mountaineers.

BLACKYAK's most advanced freeride jacket is as tough as the adventurers wearing it. The three-layer GORE-TEX PRO jacket is waterproof and breathable, with more durable fabric where you wear your rucksack or harness and lighter fabric on the hood, chest and back for maximum moisture management. The large front storage pockets are equipped with a reach-through zip for direct access to the midlayer, or the perfectly aligned chest pockets of the BLACKYAK Amrit BC pants. With its relaxed silhouette and sophisticated technical features, the RECCO®-equipped BLACKYAK Barzona BC follows you anywhere your feet or skis can take you.

# BLACKYAK AMRIT BC

2010002 - MEN

Technical three-layer GORE-TEX PRO freeride bib pants with strategically placed pockets, designed to meet the demands of extreme backcountry enthusiasts.

The brand-new BLACKYAK Amrit BC pants are a unique new style, based on the demands of BLACKYAK team member Jost Kobusch. The overall relaxed fit of these fully waterproof GORE-TEX PRO pants results in an immaculate style that comes down to what the pants are made for: maximum functionality and fit. Smartly placed pockets offer plenty of space for all necessary gear, including a chest pocket for an avalanche receiver. The RECCO®-equipped backcountry pants are designed to offer incredible freedom of movement, protection and breathability.

Padded two-layer GORE-TEX resort jacket with all the essential features for unforgettable adventures on and off the slopes.

The BABY YAK insulation makes the men's BLACKYAK Pajuna the ideal resort jacket for all winter conditions. This cleanly designed two-layer GORE-TEX jacket will keep you warm and protect you against the elements, no matter what Mother Nature throws at you. The unique hanging construction of the fixed snow skirt ensures that it automatically fits tightly around the waist when the jacket is closed. The shoulder areas of the BLACKYAK Pajuna are seamlessly constructed to avoid pressure points when carrying a rucksack.

# INSULATION & HYBRID LAYERS MEN

1810039 - MEN

Our most versatile and robust down jacket for cold weather conditions.

The compact and very versatile BLACKYAK Thebe jacket is made for cold conditions. The YAK BOX-WALL™ Air Flow Construction of the chambers traps warm air inside the system and keeps it floating between the individual chambers, minimising heat convection. To avoid thread exposure and likely damage to the construction, the down chambers are divided through seams, where the thread is located inside and protected from damage through layers of fabric.

Sizes: S, M, L, XL, XXL  
 Weight: 702 g / 24.8 oz  
 Fit: Athletic

CORDURA® |

Our most thermally efficient insulation product with enhanced range of movement.

The BLACKYAK Niata jacket redefines performance in the insulated product category. It is constructed using BLACKYAK down stretch zones. BLACKYAK down stretch zones combine materials and the YAK BOX-WALL™ Air Flow Construction to allow an extended range of movement while maintaining a high thermal efficiency. In addition to goose down, G-LOFT® synthetic down is used in high compression areas.

Men's hybrid packable midlayer jacket with natural down and Climashield® insulation for ultimate performance in colder climates.

Packed with the best natural and synthetic insulation, the BLACKYAK Podolian is designed to keep you warm when the weather turns ugly. The bonded YAK-styled chambers on the chest are filled with blown-in 600 cuin goose down, resulting in a super nice, soft and warm feeling around the core areas. The abdomen, shoulders and arms are padded with Climashield® to increase durability in higher-strain areas without sacrificing thermal performance.

A down jacket with a great range of use, which can be worn both as a top layer as well as underneath a 3L jacket.

The BLACKYAK Nelore jacket is made using CORDURA® lightweight Ripstop and CORDURA® Fleece. This jacket has been filled using 700 cuin, traceable goose down treated to be water repellent. The jacket has a great range of use as it is lightweight and has a very small packing volume. You can wear it as a warmer underneath your 3L Jacket or as a warming item. The innovative design and coloration make the BLACKYAK Nelore jacket a real statement.

Durable stretch jacket with an advanced level of ventilation and merino wool lining.

The BLACKYAK Modicana jacket was conceived to solve user demands for a robust BLACKYAK MIDSHELL® garment that allows reasonable insulation with a high level of ventilation. The 'comfort mapping' design uses four-way stretch CORDURA® to ensure great durability. The BLACKYAK developers created an intimate bond with merino wool for this material. Finally, laser perforations were added to create extremely high vent areas at high sweat points.

# BLACKYAK ISTOBEN

2010008 - MEN

Technical ski touring pants made with the most functional material mix for maximum performance.

Introducing possibly the best ski touring pants in the world: the BLACKYAK Istoben for men is the mountaineering trouser that will go anywhere and reach everywhere with you. For maximum performance, the shell consists of six different stretch materials, including four different types of CORDURA® fabric. Intelligent panelling guarantees uninhibited freedom of movement and an incredibly good fit at maximum breathability and protection. With their outstanding functionality and very articulated fit, the BLACKYAK Istoben pants are an indispensable component in every ski mountaineer's gear closet.

# BLACKYAK YANBIAN

2010009 - MEN

Minimalist and effective overpants with warm Climashield® padding.

When you reach the summit and take a moment to breathe before the well-deserved descent, the last thing you want is for your muscles to cool down. Thanks to the full-length side zips with snap buttons on the hips and leg hems, the BLACKYAK Yanbian pants can be fitted quickly and easily over ski touring pants, even when you are wearing your skis. If the conditions are wet, throw a rain shell over your BLACKYAK Yanbian pants to be fully protected.

FIERY RED

Our most thermally efficient expedition jacket for very cold conditions.

The BLACKYAK Taurus jacket is made for very cold conditions. The water-repellent treated and traceable goose down (750 cuin) keeps the body warm and insulated. The top-stitching has been removed, a construction which avoids seam failure through thread damage. Its heat retention is excellent due to the YAK BOX-WALL™ Air Flow Construction. This mesh 'box-wall' construction allows the warm air inside the jacket to circulate from chamber to chamber which provides excellent warmth.

Sizes (unisex): S, M, L, XL, XXL  
Fit: Athletic

# BLACKYAK MOUNTAIN SHEMAĞ

1810003 - UNISEX

The head, chest and face protection system tested and verified for high-mountain applications.

The BLACKYAK Mountain Shemagh offers high-performance protection in all cold weather conditions. The multi-position design provides an intimate fit to the face, head, neck and upper chest. Three-dimensional construction minimises the ingress of draughts and cold air, significantly reducing cold spot formations on exposed skin.

# BLACKYAK BARZONA BC

2011001 - WOMEN

Fully equipped three-layer GORE-TEX PRO jacket for the female backcountry adventurer.

The relaxed silhouette of the women's BLACKYAK Barzona BC is packed from hood to waist with the most sophisticated features. The three-layer GORE-TEX PRO jacket is fully waterproof, with more durable fabric used in areas of high wear and tear like shoulders, arms and waist, and softer fabric on the hood, chest and back for maximum moisture management and comfort. The unique BLACKYAK Hugger Hood has an inside construction with elasticated microfibre that embraces the head and perfectly stays in place. With its great features and iconic BLACKYAK design, the RECCO®-equipped BLACKYAK Barzona BC is the only jacket you'll ever need for your backcountry adventures.

# INSULATION & HYBRID LAYERS WOMEN

WOMEN'S INSULATION  
& HYBRID LAYERS

Our most versatile and robust down jacket for cold weather conditions.

The compact and very versatile BLACKYAK Thebe jacket is made for cold conditions. The YAK BOX-WALL™ Air Flow Construction of the chambers traps warm air inside the system and keeps it floating between the individual chambers, minimising heat convection. To avoid thread exposure and likely damage to the construction, the down chambers are divided through seams, where the thread is located inside and protected from damage through layers of fabric.

Sizes: XS, S, M, L, XL  
 Weight: 702 g / 24.8 oz  
 Fit: Athletic

CORDURA® |

Lightweight and highly breathable midlayer.

The BLACKYAK Calvana brings together all of our expertise in user comfort and product performance. The advanced textiles in YAK FLOW™ Comfort Technology are tuned to allow a precise amount of air permeability. This continuous airFLOW™ prevents overheating and allows the fast removal of humidity and sweat build-up. The result is a product that works as a midlayer during high output activities in cold weather and as a layering piece that optimises the vapour rate when used in conjunction with a shell product.

Sizes: XS, S, M, L, XL  
 Fit: Performance

# MID- LAYERS WOMEN

Durable stretch jacket with an advanced level of ventilation and merino wool lining.

The BLACKYAK Modicana jacket was conceived to solve user demands for a robust BLACKYAK MIDSHELL® garment that allows reasonable insulation with a high level of ventilation. The 'comfort mapping' design uses four-way stretch CORDURA® to ensure great durability. The BLACKYAK developers created an intimate bond with merino wool for this material. Finally, laser perforations were added to create extremely high vent areas at high sweat points.

Sizes: XS, S, M, L, XL  
 Weight: 507 g / 179 oz  
 Fit: Athletic

CORDURA® |

Our expedition proof hoody for your everyday use.

Functional and warm, with a design that feels and fits like a hoody. For additional warmth, the BLACKYAK Burlina Hoody features down padding consisting of 750 cuin water-repellent traceable goose down over the front panels and in the hood. It is produced using CORDURA® fleece and CORDURA® lightweight ripstop fabric. This expedition-approved BLACKYAK Burlina hoody is breathable, offers great freedom of movement and has two hand warmer pockets with zips.

**Durable fleece hoody.**

The BLACKYAK Mishima hoody is an insulation product for cold and dry environments and multi-use activities. The fleece construction uses CORDURA® fibres for excellent durability and mechanical strength. Core muscles are further protected from cold temperatures with the addition of a bonded stretch panel on the front of the garment. The panel features signature BLACKYAK styling and integrates four pockets with zip closures.

Sizes: XS, S, M, L, XL  
 Weight: 445 g / 15.7 oz  
 Fit: Athletic

# BLACKYAK YANBIAN

2011009 - WOMEN

Comfortable thermal overpants for women with warm Climashield® padding.

The construction of the BLACKYAK Yanbian pants for women is as effective as it is simple: the warm and supple Climashield® padding prevents the muscles from cooling down when you reach the summit. Thanks to the full-length side zips with snap buttons on the hips and leg cuffs and a partially elasticated waistband, the pants can be fitted quickly and easily over ski touring pants, even when wearing the skis. If the conditions are wet, throw a rain shell over your BLACKYAK Yanbian pants to be fully protected.

PREVIEW

**BLACKYAK  
PRODUCT FIT  
DEFINITION**

We want our users to get the most out of their outdoor experiences. As no two people are made the same, we have organised our products into specific fits to make finding the ideal product as easy as possible. At BLACKYAK, we have two defined fit categories: ATHLETIC FIT and PERFORMANCE FIT.

**PERFORMANCE FIT**

With our PERFORMANCE FIT philosophy, BLACKYAK has looked at how garments need to work together for an optimum user experience. To keep the physiological burden as low as possible, our PERFORMANCE FIT products feature a slightly more generous cut to allow efficient thermal management and comfort when multiple layers are used in combination.

The BLACKYAK PERFORMANCE FIT provides the user with the most ergonomic styling for outer layer garments and multilayer matching.

**ATHLETIC FIT**

The key to great user comfort is the efficient management of the wearer's personal microclimate. BLACKYAK products that feature our ATHLETIC FIT have been designed with an intimate, next-to-skin cut and use innovative materials. The materials we use and our design allow for an unimpeded range of movement while enhancing wearer comfort through effective moisture management.
