

WORKBOOK **CYCLING_FW24**

poc

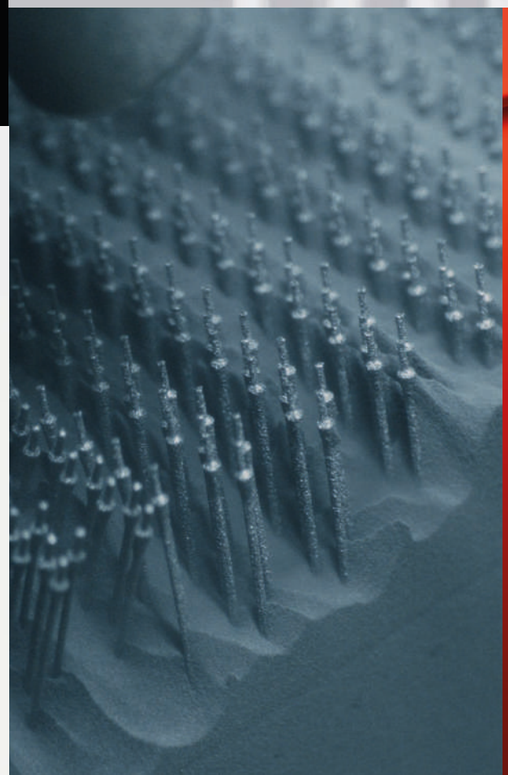

POC is a Swedish protection brand and manufacturer of helmets, eyewear, protection and apparel in snow sports and cycling. The company was founded in Sweden in 2004 and the headquarter is located in Stockholm.

Our mission is to **'PROTECT LIVES AND REDUCE THE CONSEQUENCES OF ACCIDENTS FOR ATHLETES AND ANYONE INSPIRED TO BE ONE'**

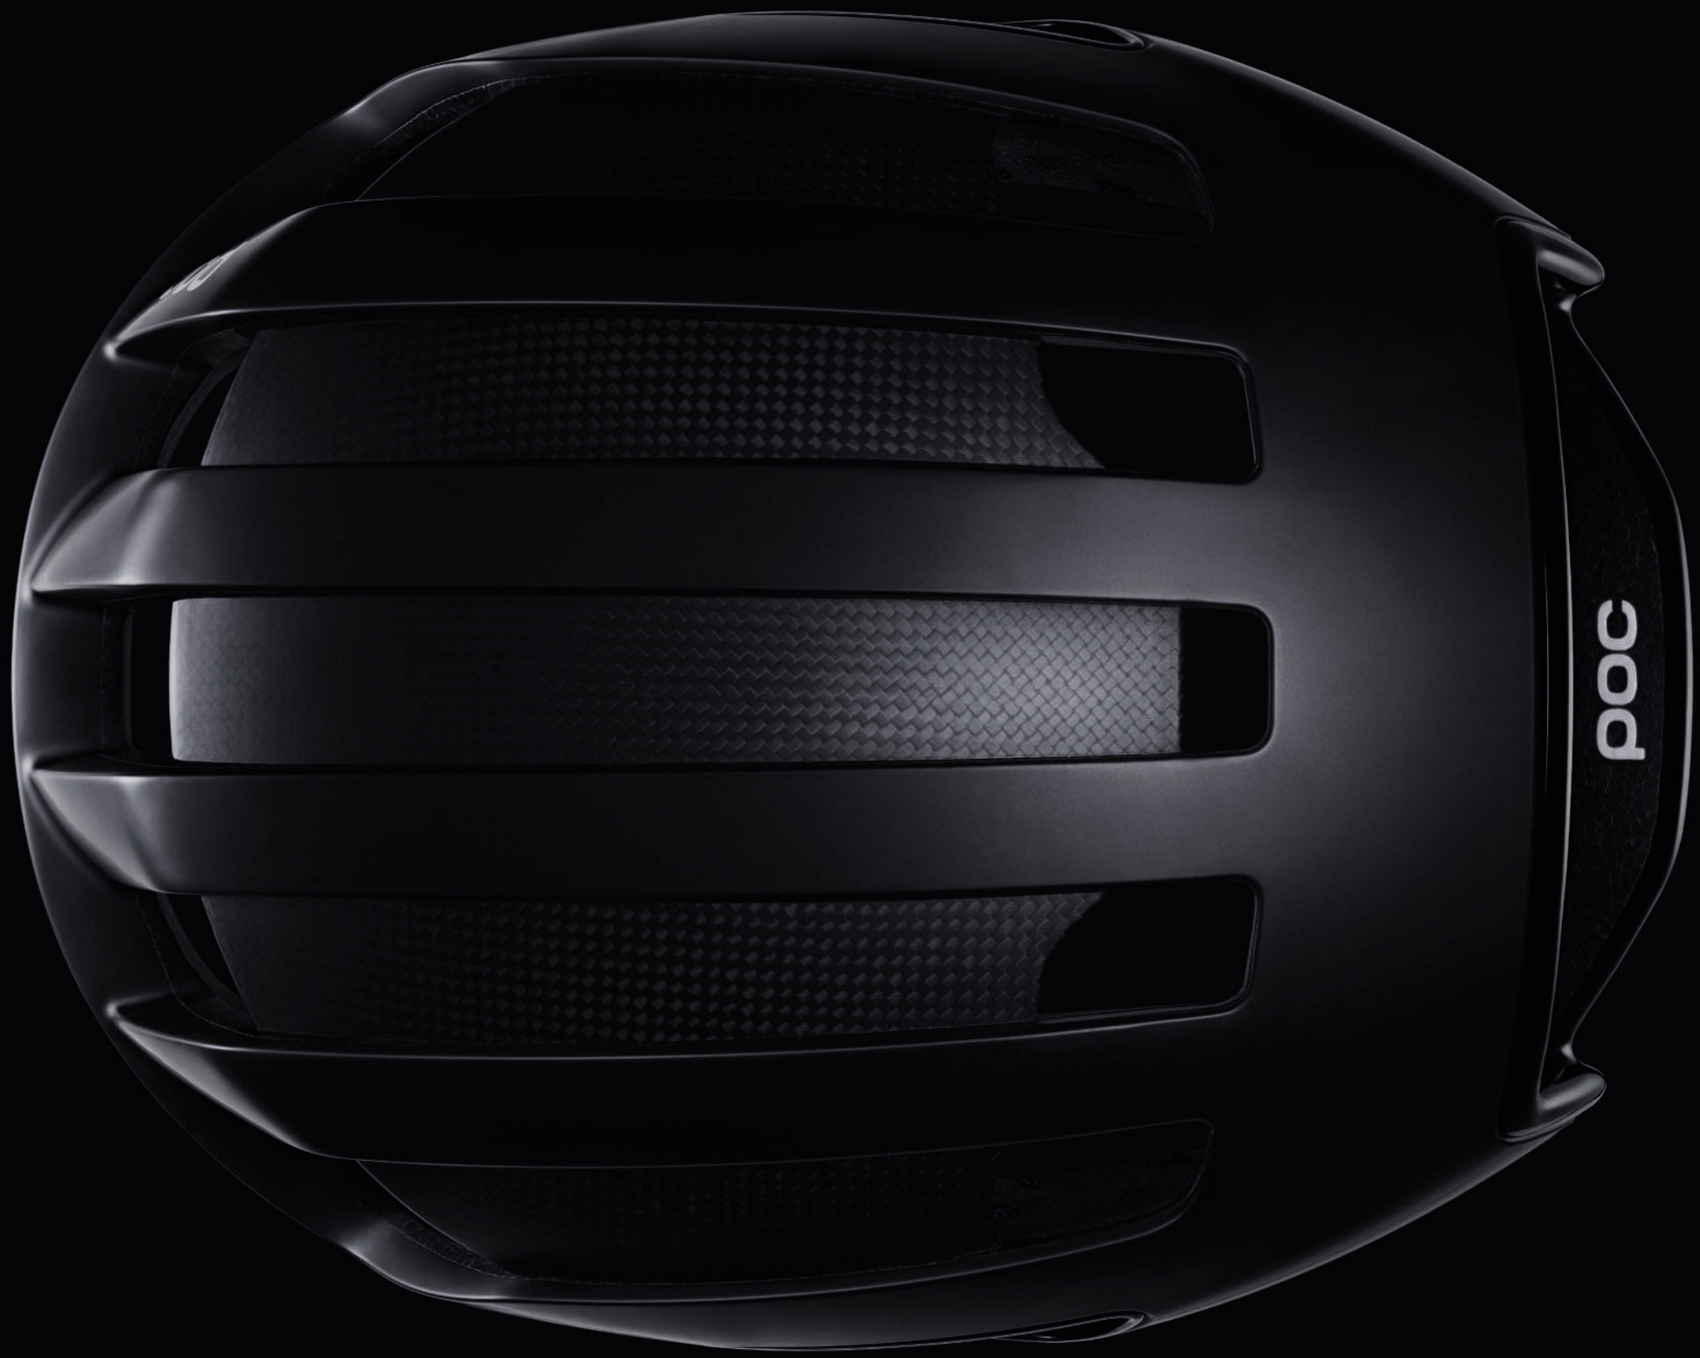

HELMETS_

PROTECTING THE BRAIN AND PERFORMANCE

The brain is a complex organ that controls our emotions, thoughts, motor skills and every process that regulates our body. It's the single most important part of the human body to protect and that is why it's so important to never stop innovating, researching and developing products to protect our brain and performance.

APPAREL_

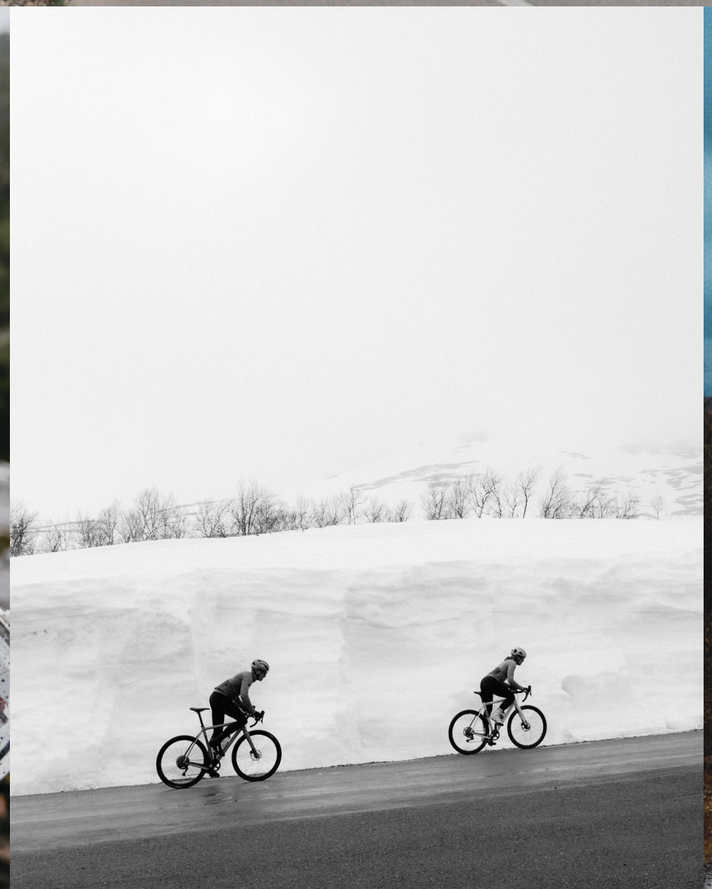

THE BEST APPAREL FOR EXTREME CONDITIONS

We have grown up riding in harsh and changing conditions, and we've experienced just how decisive the right equipment can be. That is why it's so important for us to create the best apparel for extreme conditions. Without it, it would be impossible for us to enjoy our wonderful surroundings and the world around us.

EYEWEAR & CLARITY LENS TECHNOLOGY

Clarity™ is POC's innovative lens program. Designed to control the color spectrum for enhanced contrast and color definition. All combinations of tints, mirrors and technology have been carefully selected to minimize glare and to utilize the full effect of the base tint benefits. All to ensure vision can stay sharp when riding in extreme conditions, even the changing ones.

CLARITY ROAD

Clarity Road lenses have specific tints that are optimized for the road environment. The lenses increase contrast on the road surface for sharper definition and allow the rider to react earlier to surface irregularities.

CLARITY TRAIL

Clarity Trail lenses have tints which are specifically designed to enhance contrast and boost trail associated colors, such as green and brown.
MTB riding is often subject to abrupt changes in light and shadow and as such the lenses are optimized for variable light conditions.

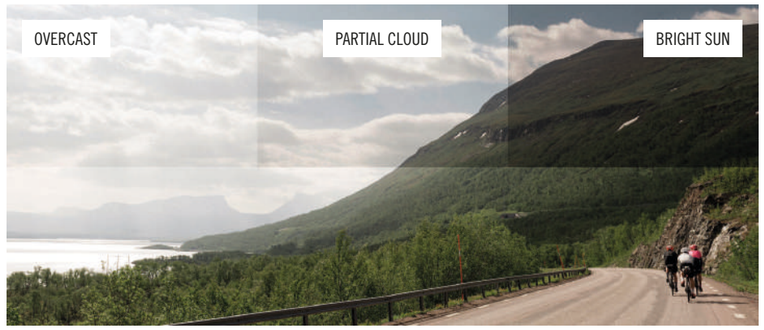

CLARITY UNIVERSAL

Clarity Universal lenses are optimized for all-round use, giving sharper contrast and definition across a broad range of colours and light conditions.

CLARITY PHOTOCHROMIC

Clarity Photochromic lenses are clear indoors and darkens automatically when exposed to sunlight. The molecules coated on the lens surface are activated by the sun's ultraviolet radiation, causing the lens to darken based on the prevailing light.

GREAT ALONE, BETTER TOGETHER

To enhance performance and protection, we always design our helmets and sunglasses so they have a seamless fit. The way in which sunglasses and helmets will be used together affects their design so that the specific needs of different kinds of rider can be met.

RECOMMENDED COMBINATIONS

HELMET_ **OTOCON** [PLATFORM] | EYEWEAR_ **ORA** [PLATFORM]

A natural choice for enduro.

HELMET_ **CORON AIR** | EYEWEAR_ **ORA** [PLATFORM]

Optimised for downhill.

HELMET_ **OTOCON** | EYEWEAR_ **OPSIN YOUTH**

A natural choice for younger riders.

HELMET_ **KORTAL** [PLATFORM] | EYEWEAR_ **DEVOUR**

For everything from all-mountain and enduro to trail.

HELMET_ **TECTAL** [PLATFORM] | EYEWEAR_ **CRAVE**

Functionality for trail and enduro.

HELMET_ **VENTRAL LITE** | EYEWEAR_ **ELICIT**

The ultimate pairing when weight is of the essence.

HELMET_ **VENTRAL** [PLATFORM] | EYEWEAR_ **PROPEL**

Controlled airflow for aerodynamic efficiency.

HELMET_ **OMNE** [PLATFORM] | EYEWEAR_ **ASPIRE**

Complementary protection for gravel, adventure, the road or the trail.

HELMET_ **VENTRAL LITE** | EYEWEAR_ **ELICIT TORIC**

The light weight combination.

CONCEPT

MTB **THERMAL_** Riding your bike all year around is not for the faint-hearted. It is cold, dark, wet, muddy and generally speaking, pretty miserable. We have grown up riding in harsh and changing conditions, and we've experienced just how decisive the right equipment can be. The Thermal collection is a tribute to all the stubborn cyclists out there.

CONCEPT

ROAD **THERMAL_**
Riding your bike all year around is not for the faint-hearted. It is cold, dark, wet, muddy and generally speaking, pretty miserable.
We have grown up riding in harsh and changing conditions, and we've experienced just how decisive the right equipment can be. The Thermal collection is a tribute to all the stubborn cyclists out there.

CONCEPT

ROAD **RACEDAY_**
We all know that marginal gains are real and that saving seconds takes years. That is why we optimize everything to the point where nothing more can be added or taken away. Whether you aspire to ride in the World Tour or are training for your first sportive, the aerodynamic Raceday collection is designed to perform on the days you need it the most.

THE BEST **PROTECTION** TO SUPPORT YOUR **MOBILITY**

VPD SYSTEM_	Race ready protection with the perfect balance between performance and protection.
Protection level:	1 & 2
Intended discipline:	Downhill, Dirt, Enduro, Trail

VPD MAX_	Maximum protection for everyone who wants to be totally safeguarded.
Protection level:	2
Intended discipline:	Downhill, Dirt, E-bike

VPD AIR_	Intuitive, lightweight and ventilated protection.
Protection level:	1 or uncertified
Intended discipline:	Trail, XC

VPD MAX VEST

The highest level of protection. Absolute comfort and flexibility. The VPD Max Vest gives extra peace of mind with no impact on freedom of movement.

DETAILS_

VPD Columns
Using a new style of VPD material, the back protector features hollow cylindrical columns molded to a robust textile base, giving immense structural strength and flexibility.

Certified protector
The protector meets the EN 1621-2, Level 2 certification level, the highest level of protection.

Made for the cold
The highly flexible cylindrical VPD structure moulded to fabric makes the vest particularly flexible in extreme cold, and does not become rigid in the same way as traditional foam protectors.

Lightweight
The complete vest is lightweight and it's easy to forget you are wearing it once you put it on.

Shaped for comfort
Both the cut of the vest and the shape of the backplate are optimised for absolute comfort and security, with no impact on freedom of movement.

Waistband free
The malleability and support in the material means there is no need for a waistband.

Quick-drying
The vest is constructed from a lightweight and highly durable recycled polyester/elastane mesh with 4-way stretch, offering exceptional wicking properties. It is also quick to dry.

Easily packable
The highly flexible protector makes it easy to roll up or fold the back protector for easy packing and travel. It can even safely be left rolled up in a car overnight and worn straight away, without needing to thaw.

M'S: Small, Medium, Large W'S: Small, Medium

ARTICLE NO. **20475 & 20481**

The hollow cylindrical columns maintain the highest impact protection properties, and are certified to EN1621-2, Level 2 standards.

SHORTS & PANTS

All our shorts and pants are developed for durability, practicality, comfort and protection. All are cut to work with knee pads and give exceptional comfort and coverage while pedalling. The material choices ensure the garments can withstand damage from falling.

BIBS

Bib shorts can make or break a ride, and the rider. Essential for performance and comfort whether on a short, intense criterium or a long endurance adventure, getting the right bib shorts is vital. We build all our bibs around our unique VPDS inserts with silicone in the chamois. They use silicone for shock and vibration absorption so you can sit more comfortably for longer.

CHAMOIS_

The addition of silicone-based VPDS in the chamois pad is what makes our bibs truly unique. The silicone aids shock and vibration absorption, enhancing comfort: vital when sitting for longer periods of time.

CONTOUR

- 3D-molded silicone-based VPDS inserts for reduced vibration and enhanced anatomic support.
- 3D-shaped for maximum support and comfort.
- Seamless design for comfort and support.
- Additional support in the frontal area.
- Bacteriostatic properties to keep the pad fresher for longer.
- Features recycled top fabric

M'S & W'S MULTI D

- Silicone based pre-cut VPDS inserts for reduced vibration and enhanced anatomic support.
- Seamless design for comfort and support.
- Perforated base layer for maximum ventilation.
- The fabric has bacteriostatic properties, which will keep your pad fresh over a longer time.
- Features recycled top fabric

AGILITY

- Silicone-based VPDS chamois developed for ergonomic and shorter saddles, and optimized for gravel and adventure riding.
- High-density zones support full pelvic rotation.
- Central channel supports blood flow and reduces pressure in the perineal area.
- A layer construction gives a slim profile for a precise connection to the bike, optimum feel and support.
- Superior breathability and moisture management thanks to enhanced perforation across the chamois
- Features recycled top fabric

VITAL

- Longer pad gives additional support in the frontal area.
- Silicone based pre-cut VPDS inserts for reduced vibration and enhanced anatomic support.
- Seamless design for comfort and support.
- The fabric has bacteriostatic properties, which will keep your pad fresh over a longer time.
- Features recycled top fabric.

W'S PURPOSE

- High-density padding at the front and silicone at the rear improves support for the pubis and ischium, enhancing comfort in an aggressive road cycling position.
- VPDS silicone inserts lift the ischium improving support, absorbing vibrations and giving a more comfortable position on the saddle.
- A large central cavity enhances comfort and allows for improved bloodflow in sensitive areas.
- Perforated cushioning enhances breathability and moisture control.
- Bacteriostatic properties keep the pad fresher for longer.

M'S & W'S CATALYST

- Silicone based pre-cut VPDS inserts for reduced vibration and enhanced anatomic support.
- Seamless design for comfort and support.
- The fabric has bacteriostatic properties, which will keep your pad fresh over a longer time.
- Features recycled top fabric

M'S & W'S VPDS LITE PAD

- 3D-molded silicone-based VPDS enhances anatomic support and improves pressure absorbency.
- Optimized for a more static position on the bike: slimmer, longer profile.
- Airy and perforated 3-layer pad for optimal breathability.
- Bacteriostatic properties keep the pad fresher for longer.
- Top-layer fabric optimized for indoor comfort – dries 2x faster than other pads so you feel drier for longer.

HELMETS_

ABS: ACRYLONITRILE BUTADIENE STYRENE

A very hard plastic used in the helmet shell. It is widely known for its impact resistance, strength and durability.

PC: POLYCARBONATE

Stiff and strong material used in the helmet shell. It is well suited to thermoforming to give a secure bond with the helmet liner.

EPP: EXPANDED POLYPROPYLENE

A helmet liner material that can withstand multiple impacts, dependent on the severity of the impact. EPP liners tend to be thicker than EPS liners.

TWICEME® NFC MEDICAL ID

The twICEme® NFC Medical ID is an NFC chip located inside the helmet. By using the associated app, wearers can upload their vital info and emergency contact details directly to the helmet. These can then be read by first responders–or anyone–with a smartphone at the scene of an accident.

EPS: EXPANDED POLYSTYRENE

The traditional helmet liner material found in most helmets (from all manufacturers). Will compress under force, and tends to only be suitable for one crash. Lighter than EPP. EPS liners can be thinner than EPP liners because EPS has better impact resistance in terms of volume of material used.

ARAMID

Exceptionally strong synthetic fibers that provide unsurpassed protection against penetration and enhance the structural stability of a helmet.

FIBERGLASS

Strong and lightweight material used in the helmet shell. Highly durable and well suited to thermo-forming, to give a secure bond with the helmet liner.

CARBON FIBER

Exceptionally lightweight and very strong material used in the helmet shell.

UNIBODY SHELL

Where the helmet shell works as a monocoque to give extra strength and stability to the entire helmet.

ARMOR

VPD: Visco-elastic polymer dough

VPD is our highly flexible protective material, visco-elastic polymer dough. VPD retains its impact absorption ability regardless of number of impacts. VPD is malleable and shapes to the form of your body for a unique and flexible fit, only hardening on impact for enhanced protection

ARMOR_

VPD

VPD is our highly flexible protective material, visco-elastic polymer dough. VPD retains its impact absorption ability regardless of number of impacts.

VPD is malleable and shapes to the form of your body for a unique and flexible fit, only hardening on impact for enhanced protection.

APPAREL_

CERAMIC PRINT

Small ceramic dots printed on a fabric to enhance durability and crash protection. The dots work to minimize friction between rider and road surface in a fall, thereby minimizing road rash and reducing damage to the garment itself.

VECTRAN

Vectran, a material around 5x stronger than steel, is a liquid crystal polymer much like a strengthened polyester. Its high tensile strength gives excellent cut, tear, abrasion and puncture resistance.

CORDURA®

A high-Denier nylon yarn used for its exceptional durability and abrasion resistance.

AERO FABRIC

A textured fabric designed to minimize drag and make a rider more easily slip through the air.

VPDS

VPDS is our Visco-elastic Polymer Dough blended with silicone. Developed for its exceptional vibration dampening effect, we use VPDS in our bib short chamois to help deliver a smoother ride.

DWR

Durable water repellent. A treatment used on our apparel to prevent water being absorbed by the material. The DWR ensures liquid pearls off the material surface for water repellency, not complete waterproofness.

WATER COLUMN

The water column indicates the level of water pressure a fabric will tolerate before any water will pass through. The higher the water column, the more waterproof the material is.

BREATHABILITY

The level of water vapour that a material will allow to pass through. Generally the measure is given in grams per square meter per 24hours (gsm/24hr). The higher the figure, the more breathable a material is.

GRS

Global Recycled Standard: An internationally recognised voluntary product standard that verifies the recycled content in a particular product.

SUNGLASSES_

GRILAMID

Lightweight, highly impact resistant, strong and weather resistant plastic, making it suitable for goggle and sunglasses frames.

BIOGRILAMID

A biologically based alternative to Grilamid, developed using plant oils.

GLOSSARY

PFC-FREE DVR
RECYCLED POLYESTER
BIO-GRILAMID
RECYCLED POLYAMIDE

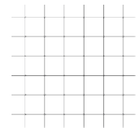

ENVIRONMENTALLY-CONSCIOUS_

Uses materials or techniques that have less impact on the environment than standard materials or techniques.

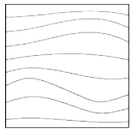

DURABLE_

Tougher materials designed to withstand scrapes and minimize the risk of tearing.

LIGHTWEIGHT_

Constructed in ways or from materials that give a lower weight than comparable products.

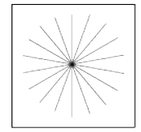

DYNAMIC FIT

Uses materials with four-way stretch for enhanced freedom of movement and exceptional comfort in the cycling position.

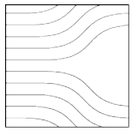

WIND RESIDSTANT_

Uses fabrics that do not let the wind pass through, giving an effective barrier against the wind.

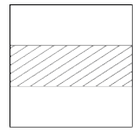

HIGHLY VISIBLE_

Uses materials or technology to ensure riders are easily noticeable.

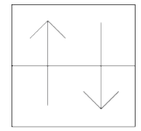

AERODYNAMIC_

Materials, design and construction that work to enhance the aerodynamic properties of the garment.

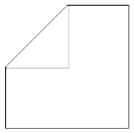

INSULATED_

Uses fabrics or construction methods that trap air to provide insulation.

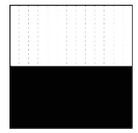

THERMALLY REGULATIVE_

Uses fabrics with properties to aid thermal regulation.

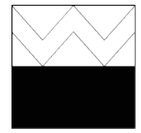

PACKABLE_

Designed and constructed in a way that allows the garment to be packed and stored in its own pocket.

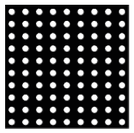

WATER RESISTANT_

Features a DWR (Durable Water Repellent) treatment for protection from light showers.

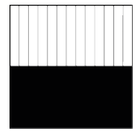

IMPACT PROTECTION_

Features materials that can absorb or dissipate impact forces to enhance protection.

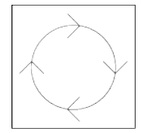

BREATHABLE_

Fabric lets air and vapour pass through for exceptional ventilation.

WATERPROOF_

Made from waterproof fabrics and with taped seams for complete protection from the rain.

RECYCLED_

Made from majority post-consumer recycled materials.
