WORKBOOK **SNOW_24**

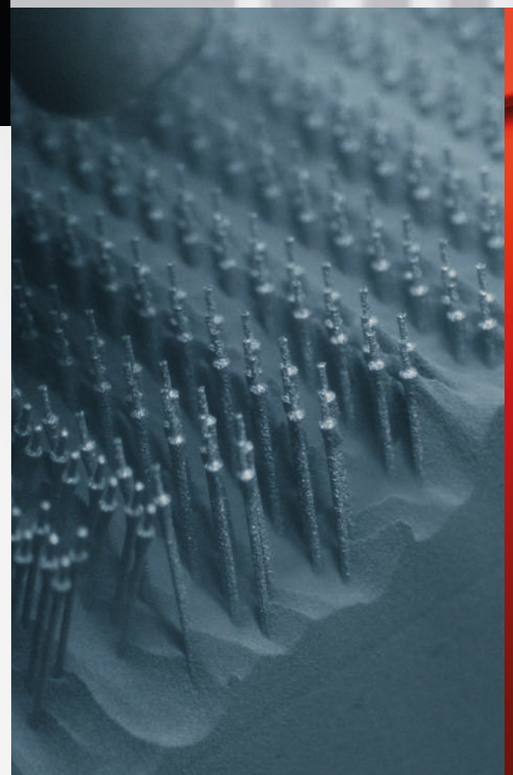

POC is a Swedish protection brand and manufacturer of helmets, eyewear, protection and apparel in snow sports and cycling. The company was founded in Sweden in 2004 and the headquarter is located in Stockholm.

Our mission is to **'PROTECT LIVES AND REDUCE THE CONSEQUENCES OF ACCIDENTS FOR ATHLETES AND ANYONE INSPIRED TO BE ONE'**

HELMETS_

PROTECT YOUR BRAIN AND PERFORMANCE

The brain is a complexed organ that controls our emotions, thoughts, motor skills and every process that regulates our body. It's the single most important part of the human body to protect and that is why it's so important to never stop innovating, researching and developing products to protect our brain and performance.

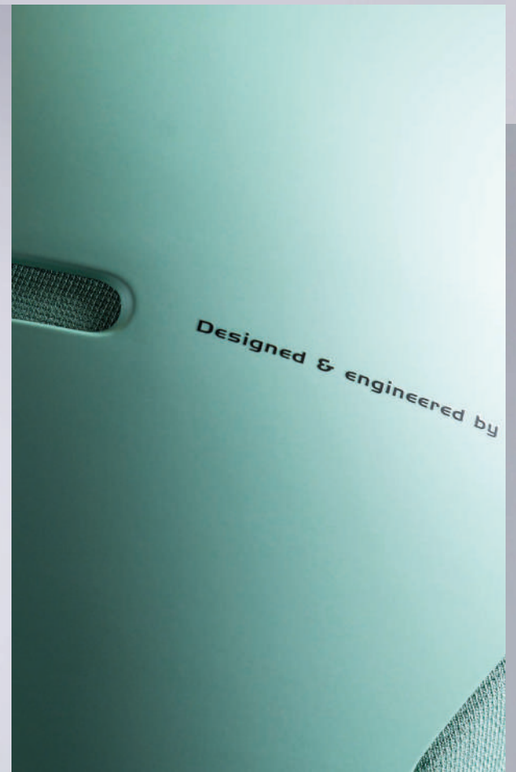

PROJECT

MONOLIT

Project Monolit is a natural part of our ongoing evolution. It's a way of emphasizing our minimalistic approach to industrial design, and Scandinavian heritage.

VPD BY POC

PROTECTING YOUR MOBILITY

It’s not hard to design protection that will keep you safe, you just make it really thick. But, if a protection is not intuitive, lightweight and agile, you probably won’t use it in the same extent. So, in order to protect you, we need to design the best protection to support your mobility. That’s how we will keep you safe.

GOGGLES_

CLARITY BY POC

POC Clarity assists the eye with color wavelength control and contrast amplification, delivering the correct intensity needed to support a specific activity or situation. Every tint, color combination and mirror is carefully developed and tested to offer the best assistance for the human eye.

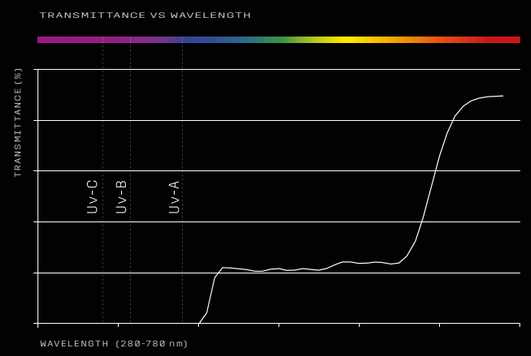

CLARITY_

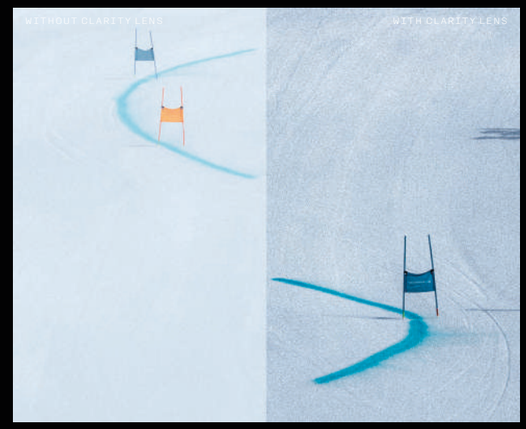

LENS TECHNOLOGY

CLARITY UNIVERSAL

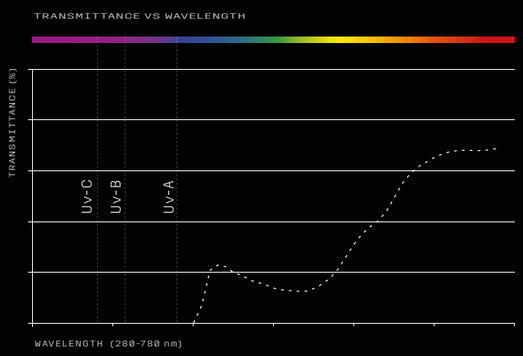

The optimal level of light management to give maximum comfort for all-day use.

CLARITY HIGHLY INTENSE

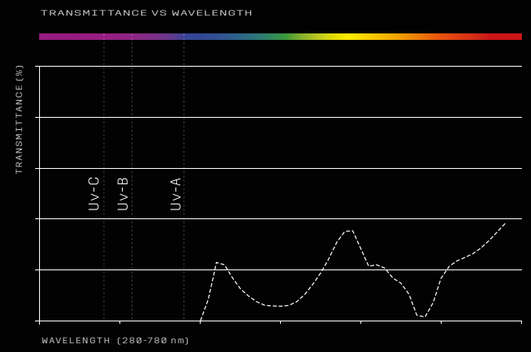

Extremely high-contrast lenses developed for competition and performance-driven activities.

CLARITY INTENSE

Extra contrast amplification and intensity giving the best assistance in a range of weather conditions.

CLARITY PHOTOCHROMIC

A photochromic lens is clear indoors and darkens automatically when exposed to sunlight. The molecules coated on the lens surface are activated by the sun's ultraviolet radiation, causing the lens to darken.

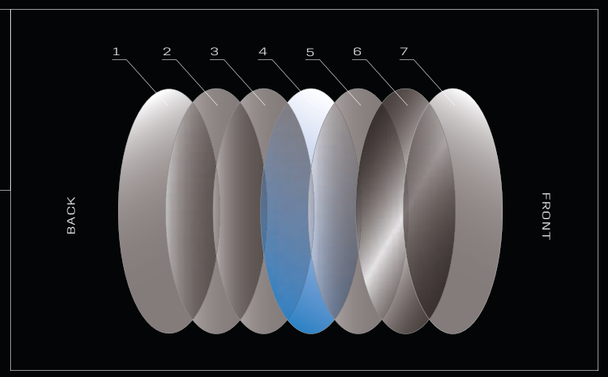

CLARITY POCITO

Adult lenses for snow environments usually offer a strong contrast in order to see the slopes better. For kids, such tints are very stressful for the eyes. The POCito tint offers a mix of comfort and visual acuity.

LENS TINTS

Our lens tints are carefully chosen to best manage specific light conditions. The lens guide demonstrates the best base lens colors and mirror coatings for different riding conditions.

CYLINDRICAL LENSES

These lenses allow for a more low-profile goggle to be designed because it is only curved along the horizontal axis. They can provide a very wide field of view.

TORIC/SPHERICAL LENSES

These lenses offer a number of benefits to support visual comfort:

- Bigger lens surface supports improved peripheral vision in every direction.
- The lens follows the shape of the eye, and is a uniform distance from the eye, which minimizes distortion.
- Better glare defense.
- Better antifog properties because there is more room between the lens and the eye.

GREAT ALONE, **BETTER** TOGETHER

To enhance performance and protection, we always design our helmets and goggles so they have a seamless fit. The way in which goggles and helmets will be used together affects their design so that the specific needs of different kinds of skiers can be met.

DISCOVER A SEAMLESS FIT

HELMET_ **OBEX MIPS** | GOGGLES_ **NEXAL**

A natural choice both on- and off-piste.

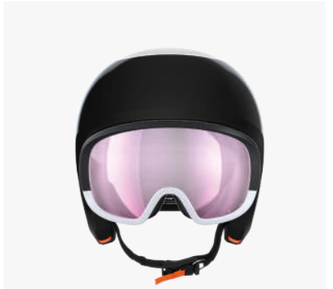

HELMET_ **MENINX** | GOGGLES_ **ZONULA**

Optimized to keep focus on what is necessary.

HELMET_ **FORNIX** | GOGGLES_ **FOVEA**

Created to work together everywhere on the mountain

HELMET_ **SKULL DURA COMP** | GOGGLES_ **FOVEA**

Tailored for the specific needs of racers.

HELMET_ **OBEX PURE** | GOGGLES_ **OPSIN**

The ideal combination for an uncomplicated experience.

HELMET_ **CALYX CARBON** | GOGGLES_ **NEXAL**

As effective while mountaineering as while skiing.

EYEWEAR_

CLARITY LENS TECHNOLOGY

Clarity™ is POC's innovative lens program. Designed to control the color spectrum for enhanced contrast and color definition. All combinations of tints, mirrors and technology have been carefully selected to minimize glare and to utilize the full effect of the base tint benefits. All to ensure vision can stay sharp when skiing and riding in extreme conditions, even the changing ones.

MENINX

Sophisticated protection lies underneath a clean and simple outer shell inspired by classic racing helmets.

DETAILS_

ABS Shell
The lightweight helmet features a robust ABS outer shell for durability and protection from scratches and dents.

Dual-material liner
Multi-impact EPP gives extra protection in the places most impacts occur, while an EPS section at the top of the head gives secure protection at a low weight.

Two-step detachable ear pads
It's easy to adjust the amount of ear coverage or remove the pads completely for a more open feel.

Adjustable ventilation
An easy-to-use slide adjuster at the front of the helmet gives complete control over ventilation.

Fidlock® buckle
The Fidlock® Buckle is easy to operate with gloves on.

NEW

FORNIX BC

The original all-mountain helmet is now tuned for the backcountry, giving extra security when heading further into the wilderness.

DETAILS_

twICEme® NFC Medical ID
The twICEme® NFC Medical ID gives instant access to vital medical info and emergency contact details.

RECCO® Reflector
A RECCO® Avalanche Rescue Reflector helps rescue services easily and quickly locate you if something goes wrong.

Mips
The addition of Mips enhances rotational impact protection.

Integrated goggle vents
Vents in the helmet align with goggles to allow steam to escape.

Aramid Panels
Aramid panels improve the structural strength of the helmet and enhance penetration protection.

VPD MAX VEST

The highest level of protection. Absolute comfort and flexibility. The VPD Max Vest gives extra peace of mind with no impact on freedom of movement.

DETAILS_

VPD Columns
Using a new style of VPD material, the back protector features hollow cylindrical columns molded to a robust textile base, giving immense structural strength and flexibility.

Certified protector
The protector meets the EN 1621-2, Level 2 certification level, the highest level of protection.

Made for the cold
The highly flexible cylindrical VPD structure moulded to fabric makes the vest particularly flexible in extreme cold, and does not become rigid in the same way as traditional foam protectors.

Lightweight
The complete vest is lightweight and it's easy to forget you are wearing it once you put it on.

Shaped for comfort
Both the cut of the vest and the shape of the backplate are optimised for absolute comfort and security, with no impact on freedom of movement.

Waistband free
The malleability and support in the material means there is no need for a waistband.

Quick-drying
The vest is constructed from a lightweight and highly durable recycled polyester/elastane mesh with 4-way stretch, offering exceptional wicking properties. It is also quick to dry.

Easily packable
The highly flexible protector makes it easy to roll up or fold the back protector for easy packing and travel. It can even safely be left rolled up in a car overnight and worn straight away, without needing to thaw.

M'S: Small, Medium, Large W'S: Small, Medium

ARTICLE NO. **20475 & 20481**

The hollow cylindrical columns maintain the highest impact protection properties, and are certified to EN1621-2, Level 2 standards.

RACE LOFT PARKA

Optimised for even more warmth, the new Race Loft Parka gives a feeling of exceptional warmth and comfort, keeping you protected from the elements and always allowing you to move freely on the mountain.

DETAILS_

Waterproof materials
The coat is constructed using a waterproof polyamide with a 10 000 mm water column. Seams and zips are not taped meaning that seepage may occur in the wettest conditions.

Thermore® insulation
The Ecodown Fibers Genius insulation from Thermore® is a synthetic loose-fibre insulation made using post-consumer recycled PET. It gives exceptional warmth, even if the fibres become wet.

Reinforced zones
Reinforced shoulder areas improve durability and reduce the chance of damage from carrying skis.

Pre-bent sleeves
The arms are shaped for optimal freedom of movement.

Helmet-compatible hood
The hood fits over a ski helmet and is easily adjustable with one hand. A reflective POC logo features.

Ski pass holder
The front-left chest pocket features an inner pocket to keep a lift pass secure.

Two-way zip
The two-way front zip improves practicality. A flap held in place by magnets covers the zip to improve water and wind protection.

Glove-friendly zips
All zippers are easily operated while wearing gloves.

Large inner pockets
Roomy mesh pockets on the inside of the coat give excellent storage.

Velcro cuff adjusters
The cuffs can easily be adjusted for a snug fit.

Tone-on-tone logo
A tone-on-tone embossed POC logo features on the bottom rear of the parka.

XS, S, M, L, XL, XXL

ARTICLE NO. **51085 & 51084**

Anywhere on the mountainside, the Race Loft Parka gives usable warmth and weather protection for long days on the slopes.

HELMETS_

ABS: Acrylonitrile Butadiene Styrene

A very hard plastic used in the helmet shell. It is widely known for its impact resistance, strength and durability.

PC: Polycarbonate

Stiff and strong material used in the helmet shell. It is well suited to thermo-forming to give a secure bond with the helmet liner.

ABS/PC

A blend of ABS and PC used in some of our helmet shells. It provides an ideal balance of durability and stiffness.

EPP: Expanded Polypropylene

A helmet liner material that can withstand multiple impacts, dependent on the severity of the impact. EPP liners tend to be thicker than EPS liners.

EPS: Expanded Polystyrene

The traditional helmet liner material found in most helmets (from all manufacturers). Will compress under force, and tends to only be suitable for one crash. Lighter than EPP. EPS liners can be thinner than EPP liners because EPS has better impact resistance in terms of volume of material used.

Aramid

Exceptionally strong synthetic fibers that provide unsurpassed protection against penetration and enhance the structural stability of a helmet.

HELMETS AND ARMOR_

VPD: Visco-elastic polymer dough

VPD is our protective material, visco-elastic polymer dough. Chiefly used in body armor but also in some helmets. VPD retains its impact absorption ability regardless of number of impacts. VPD is malleable and shapes to the form of your body for a unique and flexible fit, only hardening on impact for enhanced protection.

APPAREL_

Dyneema®

Dyneema® is one of the world's strongest materials. Around 15x stronger than steel, the material gives exceptional laceration protection.
A new kind of Dyneema® with stretch, developed specifically for POC, allows us to create flexible armor.

GOGGLES_

TPU: Thermoplastic Polyurethane

A flexible and durable plastic well suited to very cold temperatures, making it ideal for goggle frames.

CP: Cellulose Propionate

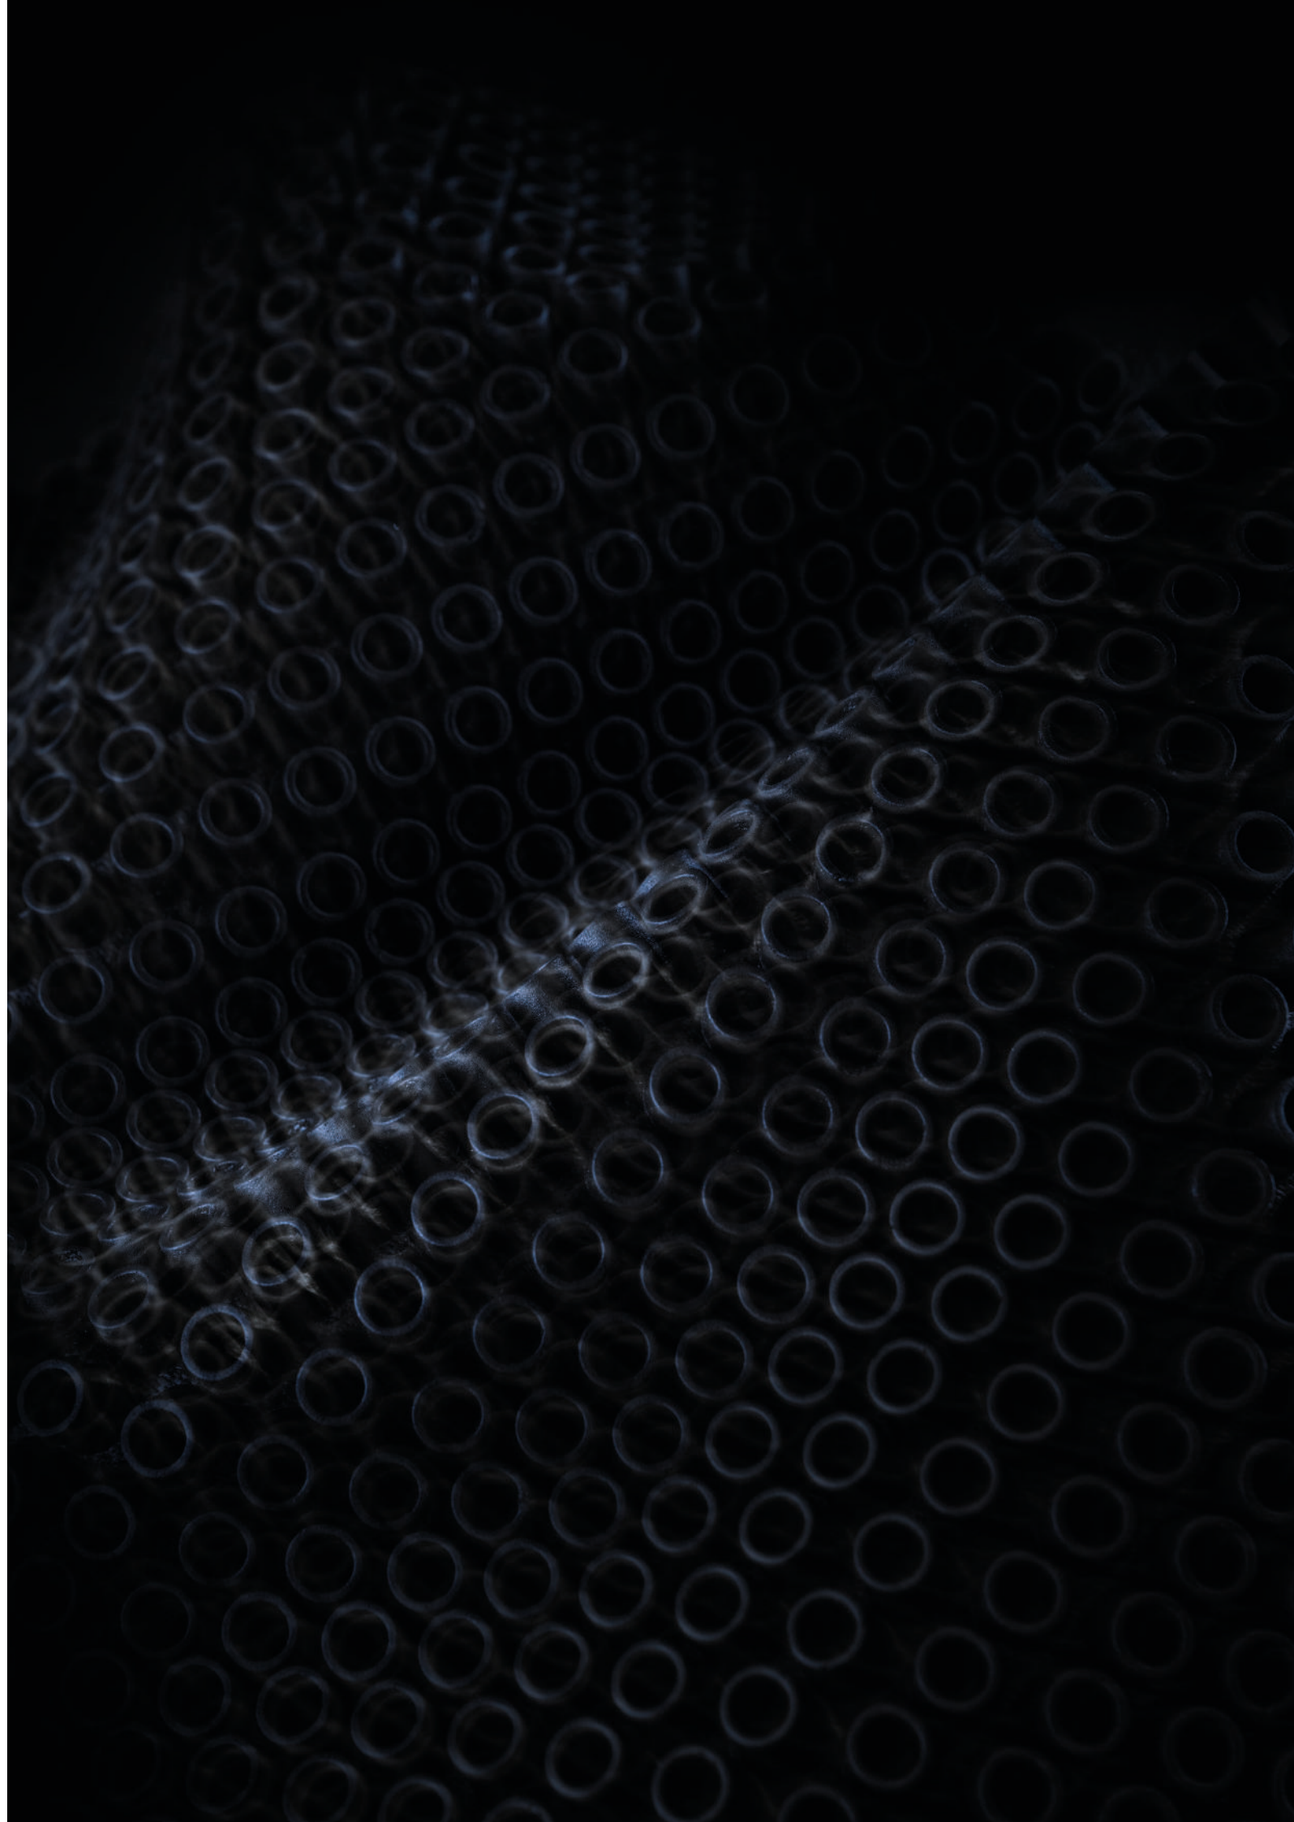

Highly durable plastic well suited to low temperatures and with excellent optical properties.

Grilamid

Lightweight, highly impact resistant, strong and weather resistant plastic, making it suitable for goggle and sunglasses frames.

PC: Polycarbonate

Strong, highly durable material with superior optical properties, making it well suited to use in goggle lenses.
