CULARIS

Find new confidence on every trail. The Cularis is the trail helmet where ventilation and weight are firmly in focus, delivering ultimate comfort when riding fast and fun trails.

ARTICLE NO. **10591**

S	51-54 CM	TBD G
M	55–58 CM	TBD G
L	59–62 CM	TBD G

CERT. **EN 1078, CPSC 1203, AS/NZS 2063**

DETAILS_

PC Shell
A lightweight PC Shell adds structural stability to the helmet.

EPS Liner
The expanded polystyrene (EPS) helmet liner is optimised to give extra protection in the areas most like to suffer from impact forces.

CFD-optimised ventilation
Extensive CFD (computational fluid dynamics) simulation was used to optimise the helmet's ventilation.

Patented breakaway peak
The helmet peak will snap off in a crash to enhance neck protection and reduce the chance of injury.

Eye Garage
It's easy to securely store sunglasses mid-ride by using the eye garage in the front ventilation inlets.

Adjustable 360° Fit
A 360° adjustment system makes it easy to find a secure, comfortable fit.

Extended protection
Extended zones around the temples and back of the head give extra protection in risk areas.

Aramid bridges
Aramid bridges are molded to the helmet liner to enhance structural stability and improve penetration protection.

Fidlock® Buckle
A Fidlock® buckle makes it easy to fasten and secure the helmet with just one hand.

Mips Air Node
The Mips Air Node module is integrated with the helmet's comfort padding and offers enhanced rotational impact protection.

CYTAL LITE

Exceptionally light and highly ventilated, the Cytal Lite helmet offers outstanding protection and comfort in the mountains.

ARTICLE NO. **10845**

S	50-56 CM	TBD G
M	54–59 CM	TBD G
L	56–61 CM	TBD G

DETAILS_

Extremely light
The helmet is our lightest so far, weighing 190g in a size M (EN1078 safety standard).

Structurally strong
The shell and liner combine to provide enhanced structural integrity for ultimate lightweight crash protection.

Lightweight EPS liner
A low-density EPS liner keeps weight as low as possible while still providing crash protection.

Lightweight in-mold PC shell
The outer PC shell is scaled back wherever possible, covering the liner only where absolutely necessary so that as many grams as possible can be saved.

Open padding structure
The comfort padding at the front of the helmet features only vertical padding, allowing more air flow across the forehead and keeping weight low.

Integrated wing
A thinner integrated wing helps control airflow through and around the helmet, and improves its aerodynamic properties

Lightweight straps
The helmet is kept securely in place thanks to the lightweight straps.

Adjustable fit
A lightweight adjustable fit system makes it easy for every used to find a secure and comfortable fit.

CYTAL

Fast. Safe. The Cytal is the ultimate choice for racers looking for a safe racing helmet that still provides ventilation, airflow and comfort at both low and high speeds.

ARTICLE NO. **10814**

S	50-56 CM	TBD G
M	54–59 CM	TBD G
L	56–61 CM	TBD G

DETAILS_

Dual-density EPS Liner
The helmet liner features two densities of EPS (expanded polystyrene), with a denser upper part and less dense lower section, delivering optimised crash protection while keeping weight low.

PC Shell
The lightweight PC shell improves structural stability and enhances helmet integrity.

Mips Air Node
The Mips Air Node, a low-friction layer laminated to the base of the comfort padding, works to improve rotational impact protection.

Integrated wing
The helmet features an integrated wing to support structural stability and improve airflow both through and around the helmet.

Adjustable 360° Fit
A lightweight 360° adjustment system makes it easy to find a secure, comfortable fit.

Eye garage
High-friction pads at the front of the helmet make it easy to store sunglasses while riding.

Adjustable strap dividers
The strap dividers beneath the ears are fully adjustable, making it easy to find a precise and secure fit.

Certifications
This helmet is certified to one or more of the following standards: EN 1078, CPSC 1203, AS/NZS 2063.

CERT. **EN 1078, CPSC 1203, AS/NZS 2063**

GREAT ALONE, BETTER TOGETHER

To enhance performance and protection, we always design our helmets and sunglasses so they have a seamless fit. The way in which sunglasses and helmets will be used together affects their design so that the specific needs of different kinds of rider can be met.

RECOMMENDED COMBINATIONS

HELMET_ **OTOCON** [PLATFORM] | EYEWEAR_ **ORA** [PLATFORM]

A natural choice for enduro.

HELMET_ **CORON AIR** | EYEWEAR_ **ORA** [PLATFORM]

Optimised for downhill.

HELMET_ **CULARIS** | EYEWEAR_ **ELICIT TORIC**

Fast and fun for the trails.

HELMET_ **KORTAL** [PLATFORM] | EYEWEAR_ **DEVOUR**

For everything from all-mountain and enduro to trail.

HELMET_ **TECTAL** [PLATFORM] | EYEWEAR_ **DEVOUR ULTRA**

Functionality for trail and enduro.

HELMET_ **VENTRAL LITE** | EYEWEAR_ **ELICIT**

The ultimate pairing when weight is of the essence.

HELMET_ **VENTRAL** [PLATFORM] | EYEWEAR_ **PROPEL**

Controlled airflow for aerodynamic efficiency.

HELMET_ **OMNE** [PLATFORM] | EYEWEAR_ **ASPIRE**

Complementary protection for gravel, adventure, the road or the trail.

HELMET_ **CYTAL** | EYEWEAR_ **ELICIT**

Lightweight, aerodynamic performance for the road.

LENS TECHNOLOGY

CLARITY
ROAD

Clarity Road lenses have specific tints that are optimized for the road environment. The lenses increase contrast on the road surface for sharper definition and allow the rider to react earlier to surface irregularities.

CLARITY
TRAIL

Clarity Trail lenses have tints which are specifically designed to enhance contrast and boost trail associated colors, such as green and brown.
MTB riding is often subject to abrupt changes in light and shadow and as such the lenses are optimized for variable light conditions.

CLARITY
UNIVERSAL

Clarity Define lenses are optimized for all-round use, giving sharper contrast and definition across a broad range of colours and light conditions.

CLARITY
PHOTOCHROMIC

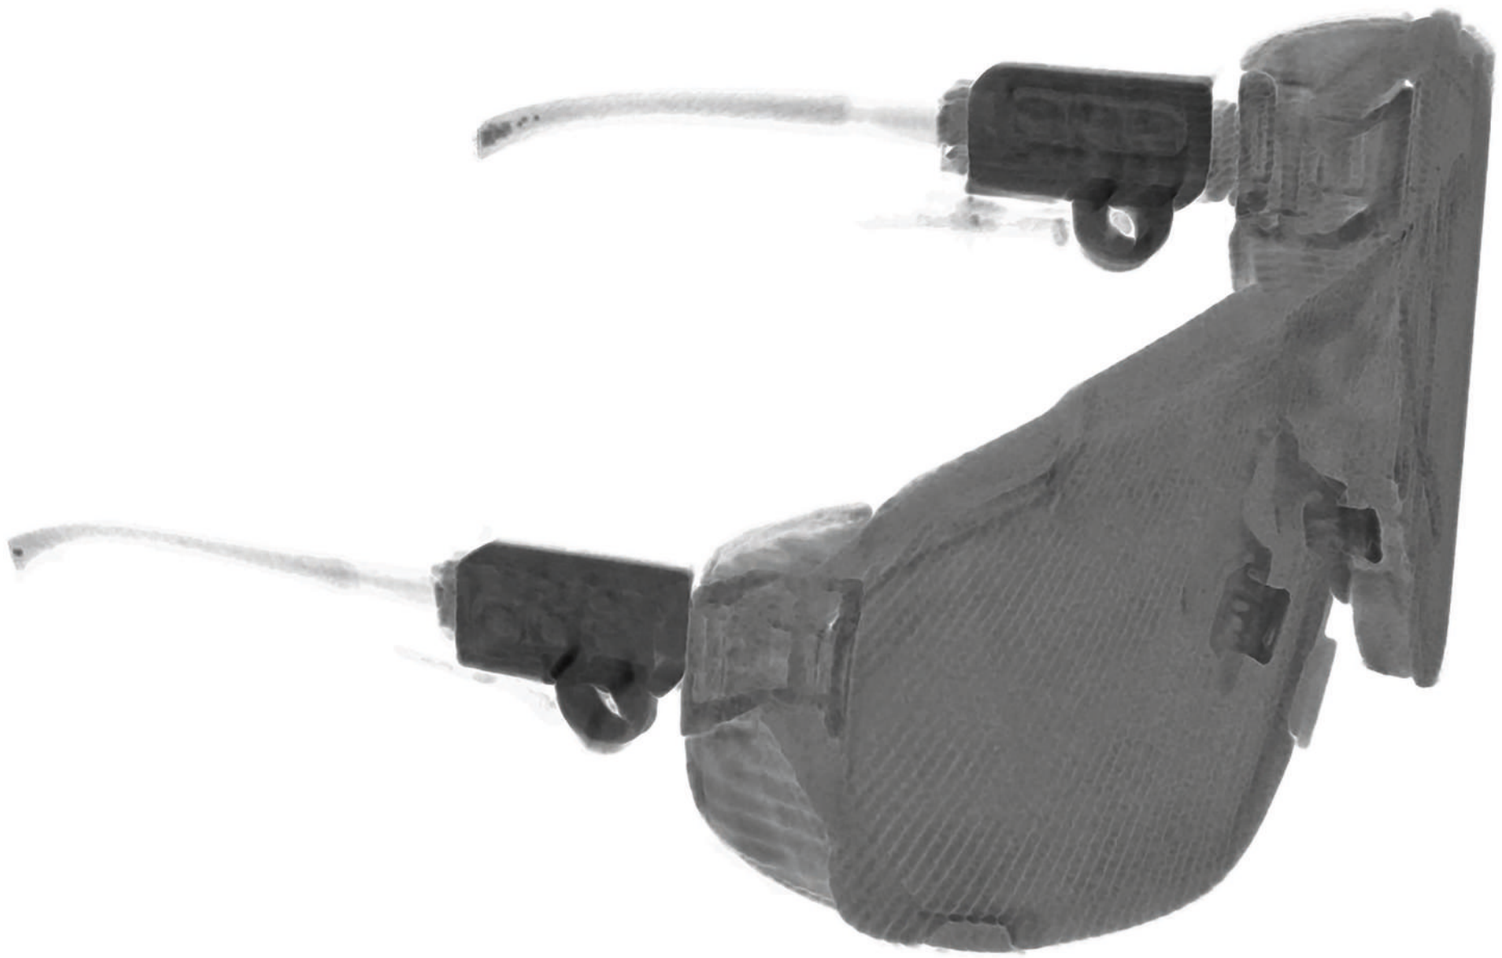

Clarity Photochromic lenses are clear indoors and darkens automatically when exposed to sunlight. The molecules coated on the lens surface are activated by the sun's ultraviolet radiation, causing the lens to darken based on the prevailing light.

ULTRA VEST

The ultimate vest for long races in all conditions, the Ultra Vest not only makes it easier to keep your hydration within easy reach but also makes it easy for others to notice you, helping keep you safe on day-long races or adventures.

DETAILS_

Stay seen
A fluorescent orange couples with reflective details to make it easier for others to see you in all conditions, which is vital for your safety on long-distance races.

Stay hydrated
The vest has a pocket to store a 2L water bladder and has space to keep a drinks tube secure.

Ride in comfort
The vest is cut with more space around the arm holes to ensure you stay comfortable while leaning over the bike.

Works over a cycle jersey
The short length of the vest means you can easily reach all your jersey pockets.

Highly breathable
The highly breathable lightweight mesh construction helps keep you comfortable even on longer rides

2 side pockets
Two smaller open pockets are included under the arms and are ideal for storing smaller items like used food packaging.

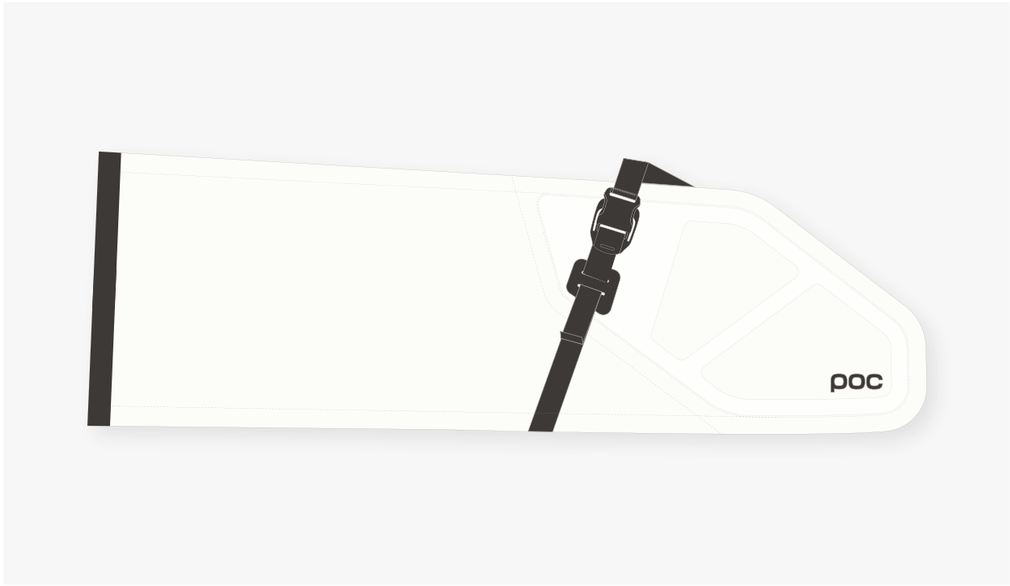

4 front pockets
The front of the vest features four large open pockets, with enough space for two soft water bottles. Two pockets feature loops to keep the bottles secure while riding over rough ground. And you'll be able to drink from the bottles without needing to remove them from the pockets.

Accessible pockets
All pockets on the vest are easily reachable while cycling

Ultra Saddle Bag 7L
Hydrogen White Translucent

NEW

ULTRA SADDLE BAG 7L

Shaped for absolute comfort and security while pedalling, the Ultra Saddle Bag 7L keeps your overnight belongings secure, dry and protected on multi-day adventures.

DETAILS_

Keeps your kit protected
The durable, waterproof construction and welded seams of the bag mean your kit will stay dry.

Find your kit easily
The translucent nature of the outer material gives more light inside the bag, making it easier to quickly find what you are looking for.

Ride comfortably
The bag is shaped to keep sway to a minimum and to not interfere with pedalling action, to keep you comfortable on long, multi-day adventrues. A rigid lower section adds stability.

Easy to attach
The three-point attachment system is easy to operate and keeps the bag securely fixed to both your saddle and seat post.

Adjustable volume
The roll-top closure on the bag gives an adjustable volume and makes it possible to fold the bag down as small as possible when carrying fewer items.

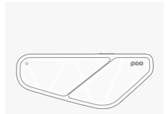

Stay visible
The bag helps you stay visible in lower light, thanks to small reflective details on each side which help to catch the light and heighten your presence to others.

NEW

ULTRA FRAME BAG 3L

The Ultra Frame Bag lets you keep all your belongings within reach while riding. Thanks to the easy-open side, you can easily reach exactly what you need without having to get off the bike.

DETAILS_

Easy access
The wide opening on the bag is carefully formed to ensure you can easily see all that is inside, even while riding.

Easy to organise
Internal storage pockets make it easy to organise all your belongings so you know exactly where to reach while riding.

Wide opening
The long zip and fold-out pouch opening mean that you can easily open the bag while riding and see all that is inside, without fear that anything will fall out.

Secure fastenings
There's no need to worry that the bag will move around too much while you ride: multiple hypalon straps give a tight and stable fit against your frame.

Waterproof
The highly durable material is fully waterproof, and combines with welded seams and waterproof zips to ensure all your belongings stay dry.

Stay visible
The bag helps you stay visible in lower light, thanks to small reflective details on each side which help to catch the light and heighten your presence to others.

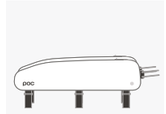

Find your gear easily
The translucent nature of the outer material gives more light inside the bag, making it easier to quickly find what you are looking for.

ULTRA TOP TUBE BAG 1.7L

Easily find what you need while on the move, and be safe in the knowledge that it is stored securely in the Ultra Top Tube Bag 1.7L

DETAILS_

Easy access
The long, waterproof, zipper can be operated with one hand, so you can access the bag easily while riding.

Easy to organise
Internal storage pockets make it easy to organise all your belongings so you know exactly where to reach while riding.

Cable port
Connecting a light to a battery pack is quick and simple, and you can keep cables neatly out of the way of harm when you thread them through the cable port.

Secure fastenings
There's no need to worry that the bag will move around too much while you ride: multiple hypalon straps give a tight and stable fit against your frame.

Bolt points
If you'd rather attach the bag with bolts, there are markings to easily punch holes.

Waterproof
The highly durable material is fully waterproof, and combines with waterproof zips to ensure all your belongings stay dry.

Stay visible
The bag helps you stay visible in lower light, thanks to small reflective details on each side which help to catch the light and heighten your presence to others.

ULTRA BAR BAG 4L

Easily reach all you need on a longer ride, and keep your belongings organised in a bag shaped to minimise impact on your aerodynamic performance.

DETAILS_

4L Volume
A volume of 4L makes it possible to carry kit and food supplies for a full day.

U-shaped zip opening
The wide, U-shaped zip opening makes it easy to see all your belongings and can easily be operated with one hand while riding.

Internal storage compartments
Three internal mesh pockets help keep your belongings organised and secure.

Cable port
A small opening in the bag makes it easy to thread a cable for a lamp through, so you can keep the battery pack secure.

Shaped for efficiency
The tapered cube shape of the bag is designed to minimise disruption to airflow around the bike.

Reflective details
Small reflective thread on the zippers and fasteners help ensure others notice you in low light.

Waterproof fabric and zippers
The bar bag is constructed from waterproof fabric and benefits from welded seams and waterproof zippers to create a completely watertight bag.

Translucent
The translucent nature of the material makes it easy to find exactly what you are looking for.

Durable
The waterproof TPU is highly durable, so the bag can keep your belongings fully protected on even the toughest rides.

NEW RECYCLED POLYESTER

M'S MOTION AIR L/S JERSEY

Your first choice for every trail ride. The jersey balances comfort, performance and durability to keep you fully focused on the trails all day long without ever having to think about your kit.

DETAILS_

Lightweight
The lightweight polyester mesh keeps the jersey light, airy and comfortable.

Quick drying
You'll stay dry and comfortable no matter how hard you push, as the material effectively wicks moisture away from your body, where it then dries quickly.

Works with body protection
The jersey is cut to give enough space for body protectors underneath, yet does not feel too loose or hang away from the body if worn without armour.

Recycled materials
The jersey is made in Italy from 100% recycled polyester, weighing 110 gsm.

Durable
You can ride safe in the knowledge that the jersey will not easily tear or snag if you ride into any trailside obstacles.

Saddle shoulder
The jersey is cut with a saddle shoulder for a clean, refined appearance, and ultimate comfort and freedom of movement while in the riding position.

XS, S, M, L, XL, XXL

NEW PFC FREE DWR

M'S MOTION DUNGAREE

Delivering ultimate comfort and warmth in colder conditions, the Motion Dungarees are for every trail rider looking for lightweight extra coverage as the seasons change.

DETAILS_

Move freely
The soft polyamide features 5% elastane for added stretch, giving excellent freedom of movement.

Stay protected
Despite their softness and flexibility, the dungarees are durable, with good abrasion resistance.

Water-repellent
The entire garment is water-repellent thanks to a PFAS-free DWR treatment that ensures water easily pearls off.

Carry your kit with ease
The dungarees feature two open hand pockets, an accessible back pocket with side entry and a zipped chest pocket, giving ample space for essential kit.

Fits with body armour
There is room for both a back protector and knee pads, and you can still pedal comfortably.

Shaped for MTB
A longer back, articulated knees and tapered legs and a gusseted crotch enhance comfort and support excellent freedom of movement for all styles of mountain biking.

Adjustable suspenders
The elastic, buckle-secured, suspenders over each shoulder are easily adjustable, so you can easily find the perfect fit.

Adjustable waist
An adjuster to the rear makes it easy to find a comfortable and secure fit around the waist.

NEW PFC FREE DWR

M'S MOTION AIR SHORTS

A natural choice for the warmest days, the lightweight and ventilated Air MTB Shorts are shaped to keep you pedalling in absolute comfort on any trail.

DETAILS_

Lightweight
Made of a material so light and flexible you'll feel completely free as you pedal.

Durable
You need not worry about rips and tears in these lightweight shorts: the material is highly durable and is built to withstand knocks from trailside obstacles.

Perforated zones
The shorts feature a perforated zone on the inside of the leg and crotch to improve airflow, so you can stay comfortable while pedalling, even on hotter days.

Splash resistant
A fluorocarbon-free durable water repellent treatment ensures water easily pearls off in light showers.

Shaped for comfort
Details like pockets that fall to the side of the thigh rather than sitting on top of the leg give extra comfort while pedalling.

Waist adjusters
You can easily find the a comfortable and secure fit: the waist adjustment band is easy to operate and is neatly hidden into shorts for a clean appearance.

Fits with knee protectors
There's enough space for POC knee protectors to be worn with the shorts without impacting on your comfort or freedom of movement.

NEW RECYCLED POLYESTER

M'S CADENCE JERSEY

The go-to jersey for every road cyclist, the new M's Essential Jersey blends technical performance with the kind of comfort that lets you keep riding all day long.

DETAILS_

All-day comfort
The jersey is constructed from a durable polyester that is soft and comfortable against the skin for ultimate comfort all day long.

Quick to dry
The lightweight fabric effectively wicks moisture away from the body, keeping you dry through every effort.

Carry your kit
Three large rear pockets give all the space you need to carry all your ride essentials.

Full-length zipper
The full-length YKK Vislon® zipper is easy to operate with one hand so you can quickly control your temperate while cycling.

Improved airflow
A lightweight mesh on the inside of the pocket next to the skin improves airflow beneath the pocket, helping to keep you cooler.

Secure pocket
Easily keep small valuables or a bank card secure in the small zipped rear pocket.

Stay seen
Reflective details at the waistline help to keep you seen in all conditions.

Elasticated gripper
A slightly wider elasticated gripper at the waist keeps the jersey comfortably and securely in place for the duration of your ride.

Recycled materials
The jersey is constructed using recycled polyester.

M'S CADENCE CARGO BIB SHORTS

These are the bibs that make it possible to ride for longer and stay more comfortable while doing so, no matter whether you are training, racing or riding for leisure. A chamois pad shaped from detailed analysis of exactly how we sit while riding features in a bib tailored for ultimate comfort while leaning forward over the bike.

DETAILS_

Patent-pending chamois
The patent-pending chamois design is shaped and constructed to give extra support and softness exactly where it is needed most. Shaping and sculpting of the pad gives support in exactly the places it is needed, keeping you comfortable in the saddle for longer.

Anatomically shaped
The shorts use a patent-pending shape to give extra room for the male anatomy, helping improve overall comfort, particularly on longer rides.

Articulated shape
The bibs are articulated in shape to enhance overall comfort while riding.

4-way stretch
You'll feel free to move naturally in any direction while wearing these bibs, thanks to the forgiving 4-way stretch built in to the fabric.

Wicks moisture away
The bibs effectively wick moisture away from your body to keep you feeling dry and comfortable.

Sun protection
The bibs give UPF50+ sun protection, so you can confidently ride in the sunshine.

Breathable torso
A lightweight fabric with perforations on the torso keeps air flowing for extra comfort, an helps keep you cooler beneath the jersey pockets.

Supportive feel
A tight, warp-knitted polyamide/elastane blend gives extra support and improves comfort on longer rides.

M'S CADENCE BIB SHORTS

Developed for absolute comfort without costing performance, these bibs feature patent-pending designs and technologies to keep you riding at your best.

DETAILS_

Patent-pending chamois
The patent-pending chamois design is shaped and constructed to give extra support and softness exactly where it is needed most. Shaping and sculpting of the pad gives support and space, with no excess pressure on more sensitive areas.

Gel inserts
A soft gel insert in the chamois works to absorb road vibrations and improve overall comfort while riding.

Compression feel
A tight, warp-knitted polyamide/elastane blend gives a supportive compression feel, supporting your muscles to perform as they become more tired.

4-way stretch
You'll feel free to move naturally in any direction while wearing these bibs, thanks to the forgiving 4-way stretch built in to the fabric.

Sun protection
The bibs give UPF50+ sun protection, so you can confidently ride in the sunshine.

Overlap suspender
Exceptionally flexible, stretchy and breathable single-layer mesh fabric makes it possible to pull down the bibs without having to take off a jersey.

Breathable mesh torso
A lightweight mesh fabric on the torso keeps air flowing for extra comfort, an helps keep you cooler beneath the jersey pockets.

Articulated shape
The bibs are articulated in shape to enhance overall comfort while riding.

MOTION MTB LONG SOCKS

HIGHLIGHTS_

Offering extra support for all mountain bikers, the sock offers extra cushioning under the sole of the foot for added comfort. A longer shaft length adds an extra layer of protection for your shins.

ARTICLE NO.
65168

Sizes
S/ 37–39
M/ 40–42
L/ 43–45

Breathable
Your feet can breathe easily all day long. The soft yarn wicks moisture away to keep you feeling dry.

Supportive
The socks provide extra support to improve comfort on long days: a high-density band around the middle of the foot helps your feet stay feeling fresh.

Cushioned sole
The soles of the sock are cushioned for extra comfort while pedalling.

Different lengths available
The socks are available in two different shaft lengths, meaning you can benefit from different levels of shin protection.

The socks provide extra support to improve comfort on long days: a high-density band around the middle of the foot helps your feet stay feeling fresh.

Waffle knit
The waffle knit structure along the shaft gives comfort and support where you need it most.

Different lengths available
The socks are available in three different shaft lengths, meaning you can benefit from the same support regardless of which style you prefer.

BIBS

Bib shorts can make or break a ride, and the rider. Essential for performance and comfort whether on a short, intense criterium or a long endurance adventure, getting the right bib shorts is vital. We build all our bibs around our unique VPDS inserts with silicone in the chamois. They use silicone for shock and vibration absorption so you can sit more comfortably for longer.

NOVUS CHAMOIS

M'S NOVUS CHAMOIS

- The majority-recycled fabric is quick to dry and soft against the skin forultimate comfort.
- Perforated foam across the entire chamois improves airflow and ventilation.
- Tapered edges give a more gradual transition away from the pad, improving all-round comfort and reducing the risk of chafing.
- A central channel aids improved bloodflow in the perineal area.
- High-density foam offers extra support and reduces pressure.
- Gel inserts embedded into the foam offer extra cushioning and vibration absorption for more comfort on longer rides.

M's Novus chamois will be Patent pending with shape being the novelty.

W'S NOVUS CHAMOIS

- The majority-recycled fabric is quick to dry and soft against the skin forultimate comfort.
- Perforated foam across the entire chamois improves airflow and ventilation.
- Tapered edges give a more gradual transition away from the pad, improving all-round comfort and reducing the risk of chafing.
- A central cutout creates a deep zone offering extra support and space for genitalia, offering reduced pressure and more breathability.
- High-density foam offers extra support and reduces pressure.
- Gel inserts embedded into the foam offer extra cushioning and vibration absorption for more comfort on longer rides.

W's Novus chamois will be Patent pending with shape being the novelty.

VPDS CHAMOIS

The addition of silicone-based VPDS in the chamois pad is what makes our bibs truly unique. The silicone aids shock and vibration absorption, enhancing comfort: vital when sitting for longer periods of time.

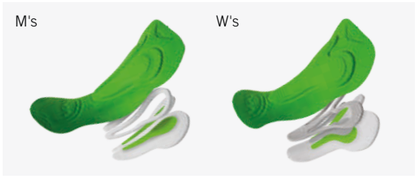

CONTOUR

- 3D-molded silicone-based VPDS inserts for reduced vibration and enhanced anatomic support.
- 3D-shaped for maximum support and comfort.
- Seamless design for comfort and support.
- Additional support in the frontal area.
- Bacteriostatic properties to keep the pad fresher for longer.
- Features recycled top fabric.

MULTI D

- Silicone based pre-cut VPDS inserts for reduced vibration and enhanced anatomic support.
- Seamless design for comfort and support.
- Perforated base layer for maximum ventilation.
- The fabric has bacteriostatic properties, which will keep your pad fresh over a longer time.
- Features recycled top fabric

VITAL

- Longer pad gives additional support in the frontal area.
- Silicone based pre-cut VPDS inserts for reduced vibration and enhanced anatomic support.
- Features recycled top fabric.
- Seamless design for comfort and support.
- The fabric has bacteriostatic properties, which will keep your pad fresh over a longer time.

PURPOSE

- High-density padding at the front and silicone at the rear improves support for the pubis and ischium, enhancing comfort in an aggressive road cycling position.
- A large central cavity enhances comfort and allows for improved bloodflow in sensitive areas.
- VPDS silicone inserts lift the ischium improving support, absorbing vibrations and giving a more comfortable position on the saddle.
- Perforated cushioning enhances breathability and moisture control.

CATALYST

- Silicone based pre-cut VPDS inserts for reduced vibration and enhanced anatomic support.
- Seamless design for comfort and support.
- The fabric has bacteriostatic properties, which will keep your pad fresh over a longer time.
- Features recycled top fabric

ABBREVIATIONS & MEASUREMENTS: 1'' = 2,5 cm, 1 cm = 0.4'', cir. = circumference

HELMETS_

ABS: ACRYLONITRILE BUTADIENE STYRENE

A very hard plastic used in the helmet shell. It is widely known for its impact resistance, strength and durability.

PC: POLYCARBONATE

Stiff and strong material used in the helmet shell. It is well suited to thermoforming to give a secure bond with the helmet liner.

EPP: EXPANDED POLYPROPYLENE

A helmet liner material that can withstand multiple impacts, dependent on the severity of the impact. EPP liners tend to be thicker than EPS liners.

TWICEME® NFC MEDICAL ID

The twICEme® NFC Medical ID is an NFC chip located inside the helmet. By using the associated app, wearers can upload their vital info and emergency contact details directly to the helmet. These can then be read by first responders–or anyone–with a smartphone at the scene of an accident.

EPS: EXPANDED POLYSTYRENE

The traditional helmet liner material found in most helmets (from all manufacturers). Will compress under force, and tends to only be suitable for one crash. Lighter than EPP. EPS liners can be thinner than EPP liners because EPS has better impact resistance in terms of volume of material used.

ARAMID

Exceptionally strong synthetic fibers that provide unsurpassed protection against penetration and enhance the structural stability of a helmet.

FIBERGLASS

Strong and lightweight material used in the helmet shell. Highly durable and well suited to thermo-forming, to give a secure bond with the helmet liner.

CARBON FIBER

Exceptionally lightweight and very strong material used in the helmet shell.

UNIBODY SHELL

Where the helmet shell works as a monocoque to give extra strength and stability to the entire helmet.

ARMOR

VPD: Visco-elastic polymer dough

VPD is our highly flexible protective material, visco-elastic polymer dough. VPD retains its impact absorption ability regardless of number of impacts. VPD is malleable and shapes to the form of your body for a unique and flexible fit, only hardening on impact for enhanced protection

ARMOR_

VPD

VPD is our highly flexible protective material, visco-elastic polymer dough. VPD retains its impact absorption ability regardless of number of impacts.

VPD is malleable and shapes to the form of your body for a unique and flexible fit, only hardening on impact for enhanced protection.

APPAREL_

CERAMIC PRINT

Small ceramic dots printed on a fabric to enhance durability and crash protection. The dots work to minimize friction between rider and road surface in a fall, thereby minimizing road rash and reducing damage to the garment itself.

VECTRAN

Vectran, a material around 5x stronger than steel, is a liquid crystal polymer much like a strengthened polyester. Its high tensile strength gives excellent cut, tear, abrasion and puncture resistance.

CORDURA®

A high-Denier nylon yarn used for its exceptional durability and abrasion resistance.

AERO FABRIC

A textured fabric designed to minimize drag and make a rider more easily slip through the air.

VPDS

VPDS is our Visco-elastic Polymer Dough blended with silicone. Developed for its exceptional vibration dampening effect, we use VPDS in our bib short chamois to help deliver a smoother ride.

DWR

Durable water repellent. A treatment used on our apparel to prevent water being absorbed by the material. The DWR ensures liquid pearls off the material surface for water repellency, not complete waterproofness.

WATER COLUMN

The water column indicates the level of water pressure a fabric will tolerate before any water will pass through. The higher the water column, the more waterproof the material is.

BREATHABILITY

The level of water vapour that a material will allow to pass through. Generally the measure is given in grams per square meter per 24hours (gsm/24hr). The higher the figure, the more breathable a material is.

GRS

Global Recycled Standard: An internationally recognised voluntary product standard that verifies the recycled content in a particular product.

SUNGLASSES_

GRILAMID

Lightweight, highly impact resistant, strong and weather resistant plastic, making it suitable for goggle and sunglasses frames.

BIOGRILAMID

A biologically based alternative to Grilamid, developed using plant oils.

PFC-FREE DVR
RECYCLED POLYESTER
BIO-GRILAMID
RECYCLED POLYAMIDE

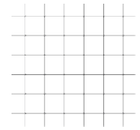

ENVIRONMENTALLY-CONSCIOUS_

Uses materials or techniques that have less impact on the environment than standard materials or techniques.

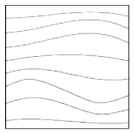

DURABLE_

Tougher materials designed to withstand scrapes and minimize the risk of tearing.

LIGHTWEIGHT_

Constructed in ways or from materials that give a lower weight than comparable products.

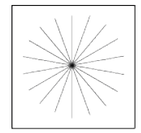

DYNAMIC FIT

Uses materials with four-way stretch for enhanced freedom of movement and exceptional comfort in the cycling position.

WIND RESISTANT_

Uses fabrics that do not let the wind pass through, giving an effective barrier against the wind.

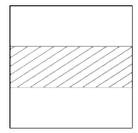

HIGHLY VISIBLE_

Uses materials or technology to ensure riders are easily noticeable.

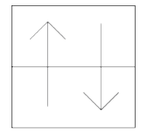

AERODYNAMIC_

Materials, design and construction that work to enhance the aerodynamic properties of the garment.

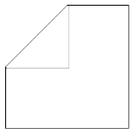

INSULATED_

Uses fabrics or construction methods that trap air to provide insulation.

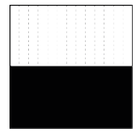

THERMALLY REGULATIVE_

Uses fabrics with properties to aid thermal regulation.

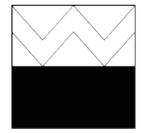

PACKABLE_

Designed and constructed in a way that allows the garment to be packed and stored in its own pocket.

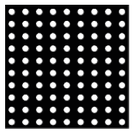

WATER RESISTANT_

Features a DWR (Durable Water Repellent) treatment for protection from light showers.

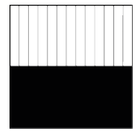

IMPACT PROTECTION_

Features materials that can absorb or dissipate impact forces to enhance protection.

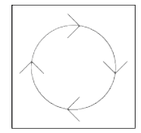

BREATHABLE_

Fabric lets air and vapour pass through for exceptional ventilation.

WATERPROOF_

Made from waterproof fabrics and with taped seams for complete protection from the rain.

RECYCLED_

Made from majority post-consumer recycled materials.
